

*"Small Town Atmosphere
Outstanding Quality of Life"*

September 30, 2021

Michael Montgomery, Executive Officer
California Regional Water Quality Control Board
San Francisco Bay Region
1515 Clay Street, Suite 1400
Oakland, CA 94612

Dear Mr. Montgomery:

Enclosed is the Fiscal Year 2020-21 Annual Report for the Town of Danville, which is required by and in accordance with Provision C.17 in National Pollutant Discharge Elimination System (NPDES) Permit Number CAS612008 issued by the San Francisco Bay Regional Water Quality Control Board.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fines and imprisonment for knowing violations.

Sincerely,

Joseph A. Calabrigo
Town Manager

Background Information				
Permittee Name:	Town of Danville			
Population:	43876			
NPDES Permit No.:	CAS612008			
Order Number:	R2-2015-0049			
Reporting Time Period (month/year):	July 2020 through June 2021			
Name of the Responsible Authority:	Joseph A. Calabrigo	Title:	Town Manager	
Mailing Address:	510 La Gonda Way			
City:	Danville	Zip Code:	94526	County: Contra Costa County
Telephone Number:	925-314-3302	Fax Number:	925-838-0546	
E-mail Address:				
Name of the Designated Stormwater Management Program Contact (if different from above):	Bob Russell	Title:	Landscape Architect & Clean Water program Coordinator	
Department:	Engineering			
Mailing Address:	510 La Gonda Way			
City:	Danville	Zip Code:	94526	County: Contra Costa County
Telephone Number:	925-314-3315	Fax Number:	925-838-0360	
E-mail Address:				

Section 2 - Provision C.2 Reporting Municipal Operations

Program Highlights and Evaluation

Highlight/summarize activities for reporting year:

Summary:

Summary:

The Town continues to utilize a Customer Relationship Management (CRM) an on-line system which allows the public to report concerns or potential hazards and provides staff with a comprehensive electronic system to track all maintenance work orders. The CRM assists our pollution prevention efforts by allowing residents as well as staff to quickly report issues and serving as a systematic, detailed tracking system. For example, in 2020/2021 Fiscal Year:

- Spills: 4 traffic accidents were cleaned up
- Illegal Dumping: Staff responded to 41 instances of illegal dumping.
- Creek Maintenance: 20 work orders entered, with work primarily consisting of manual removal of obstructions from flow lines.
- Drain inlets: Inspected 506 drain inlets and cleaned as needed, removing 22 cubic yards of debris.
- Curb Miles Swept: 7,174 swept throughout Town.

The Town's sweeping contractor continues to use an efficient regenerative air sweepers for sweeping activities throughout the Town. Maintenance staff checks the contractors' operations monthly to ensure its work is complete and to specifications. This contract includes all public parking lots maintained by the Town of Danville. The sweeping debris generated is consolidated at the Town's Service Center maintenance yard. Street sweeping debris piles are picked up two-three times a week, depending on the season and sweeping needs. The Town continues to work with the same street sweeping contractor, whose contract will be reviewed and revised in June 30, 2024.

Town maintenance staff inspects 6.1 lineal miles of creeks and ditches each year for obstructions and general clean-up activities. All creeks are walked, and obstructions are noted. Town staff or a contractor is hired to remove obstructions in the creeks with no herbicides/pesticides used. All trash and debris are picked up by in-house crews, or contractors and the work is recorded in the Town's electronic CRM system. The total amount of debris collected from creeks and channels this year was 122.5 cubic yards.

In general, Stormwater staff noticed an increase in volumes reported since the implementation of the new CRM system several years ago. In response, Maintenance staff reports that the new system is more accurate because previously information was input every two weeks, whereas now it is input daily. Staff has found with this increase in reporting, the system is a more accurate reflection of Town efforts. Roadside trash and debris is picked up and hauled to the Town's Service Center for proper disposal and the quantities are recorded. All green waste collected by the Town's Maintenance staff is recycled and the volume of trash and debris picked up is quantified and recorded in the Towns' electronic CRM system.

The Town continues its garbage/recycling collection agreement, which became effective 3/1/15. This contract continues to provide for more pick-ups at the Town's Service Center which continues to keep the maintenance yard clean. This contract provides an individual schedule for each Town facility where garbage is collected and is based on the needs of that facility. The increased frequency of the amount of trash picked

Permittee Name: Danville

up in the downtown area is helping to reduce trash loads and the contractor appears to supply the Town with more accurate accounting of debris picked up as well.

Five Maintenance staff members attended a course taught by biologist Chris Rogers on July 7, 2020, Per the Town's Streambed Alteration Agreement with the Department of Fish and Wildlife. These key personnel were trained and certified on how to identify local species habitat in Town's creeks and waterways. These staffers continue to be responsible for inspection of creeks before any work is to be done to ensure that no habitats are destroyed. Town-maintained creeks have not been cleared as in past years due to Fish and Wildlife regulations. However, inspections of creeks continue and all trash, vegetation/debris that obstruct/limit flow capacity are removed. No chemical applications were conducted in any Town maintained creeks.

The Town of Danville continues its commitment to reducing over-watering and water use through use of its Central Irrigation System on Town-owned sites which includes the five major parks (Osage Station, Sycamore Valley, Diablo Vista, Oak Hill and Hap Magee Ranch) and other smaller park sites as well as large turf areas along the roadsides. The Town continues to work with EBMUD to identify water requirements for Town-maintained areas, utilizing EBMUD's Water Smart Program and information from the water billings to check water usage. This helps from year to years to confirm water usage based on annual Evapo-transpiration rate (ET). This information is used so proper irrigation adjustments can be made. The Town continues to use using daily Evapo-transpiration (ET) information to adjust the watering schedules at 33 sites and ET information is used to make seasonal and weather-related water adjustments. The Town continues its testing of a newer technology that uses underground soil moisture sensors to determine irrigation based on exactly how much water each site needs.

The Town continues its on-going program to identify areas where either drought tolerant or native plant material could potentially replace plant material that require more water. Every year, as the budget allows and approved by the Town Council, higher water use landscaping is gradually replaced with drought tolerant/low water requiring species. Grass has been removed from all Town-maintained medians and median narrow median noses and replace with either cobbles or mulched to reduce water and eliminated chemical usage. Over an acre of grass was removed from various sites this year.

The Town's landscape maintenance contractors are Bay Friendly certified, and the Town contracts include language that makes IPM a requirement. Even though Town staff does not do any pest management, the Town's Maintenance Services supervisor has attended IPM Guidance Manual Training to learn new information for the Town's IPM program. The Town also contracts with a company to do IPM structural pest control for all Town-owned buildings/facilities. For more information on IPM methods the Town implements see Section C.9 of this report.

Refer to the C.2 Municipal Operations's section of the countywide Program's FY 20-21 Annual Report (if applicable) for a description of activities implemented at the countywide and/or regional level. The Town's Stormwater Program manager participates in the countywide program's Municipal Operations Committee/Work Group on a volunteer basis in addition to other committees.

C.2.a. ► Street and Road Repair and Maintenance

Place a **Y** in the boxes next to activities where applicable BMPs were implemented. If not applicable, type **NA** in the box and provide an explanation in the comments section below. Place an **N** in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented and the corrective actions taken.

Y	Control of debris and waste materials during road and parking lot installation, repaving or repair maintenance activities from polluting stormwater
Y	Control of concrete slurry and wastewater, asphalt, pavement cutting, and other street and road maintenance materials and wastewater from discharging to storm drains from work sites.
Y	Sweeping and/or vacuuming and other dry methods to remove debris, concrete, or sediment residues from work sites upon completion of work.

Comments:

C.2.b. ► Sidewalk/Plaza Maintenance and Pavement Washing

Place a **Y** in the boxes next to activities where applicable BMPs were implemented. If not applicable, type **NA** in the box and provide an explanation in the comments section below. Place an **N** in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented and the corrective actions taken.

Y	Control of wash water from pavement washing, mobile cleaning, pressure wash operations at parking lots, garages, trash areas, gas station fueling areas, and sidewalk and plaza cleaning activities from polluting stormwater
Y	Implementation of the BASMAA Mobile Surface Cleaner Program BMPs

Comments:

C.2.c. ► Bridge and Structure Maintenance and Graffiti Removal

Place a **Y** in the boxes next to activities where applicable BMPs were implemented. If not applicable, type **NA** in the box and provide an explanation in the comments section below. Place an **N** in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented, and the corrective actions taken.

Y	Control of discharges from bridge and structural maintenance activities directly over water or into storm drains
Y	Control of discharges from graffiti removal activities
Y	Proper disposal for wastes generated from bridge and structure maintenance and graffiti removal activities
Y	Implementation of the BASMAA Mobile Surface Cleaner Program BMPs for graffiti removal
Y	Employee training on proper capture and disposal methods for wastes generated from bridge and structural maintenance and graffiti removal activities.
NA	Contract specifications requiring proper capture and disposal methods for wastes generated from bridge and structural maintenance and graffiti removal activities.

Comments:

Graffiti found or reported is painted over or cleaned off signs by staff. If a mobile cleaner is necessary, the policy is to hire certified mobile cleaners

C.2.e. ► Rural Public Works Construction and Maintenance	
Does your municipality own/maintain rural ¹ roads:	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No
If your answer is No then skip to C.2.f.	
Place a Y in the boxes next to activities where applicable BMPs were implemented. If not applicable, type NA in the box and provide an explanation in the comments section below. Place an N in the boxes next to activities where applicable BMPs were not implemented for one or more of these activities during the reporting fiscal year, then in the comments section below provide an explanation of when BMPs were not implemented and the corrective actions taken.	
<input type="checkbox"/>	Control of road-related erosion and sediment transport from road design, construction, maintenance, and repairs in rural areas
<input type="checkbox"/>	Identification and prioritization of rural road maintenance based on soil erosion potential, slope steepness, and stream habitat resources
<input type="checkbox"/>	No impact to creek functions including migratory fish passage during construction of roads and culverts
<input type="checkbox"/>	Inspection of rural roads for structural integrity and prevention of impact on water quality
<input type="checkbox"/>	Maintenance of rural roads adjacent to streams and riparian habitat to reduce erosion, replace damaging shotgun culverts and excessive erosion
<input type="checkbox"/>	Re-grading of unpaved rural roads to slope outward where consistent with road engineering safety standards, and installation of water bars as appropriate
<input type="checkbox"/>	Inclusion of measures to reduce erosion, provide fish passage, and maintain natural stream geomorphology when replacing culverts or design of new culverts or bridge crossings
Comments including listing increased maintenance in priority areas:	

¹Rural means any watershed or portion thereof that is developed with large lot home-sites, such as one acre or larger, or with primarily agricultural, grazing or open space uses.

C.2.f. ► Corporation Yard BMP Implementation				
Place an X in the boxes below that apply to your corporations yard(s):				
<input type="checkbox"/>	We do not have a corporation yard			
<input type="checkbox"/>	Our corporation yard is a filed NOI facility and regulated by the California State Industrial Stormwater NPDES General Permit			
<input checked="" type="checkbox"/>	We have a Stormwater Pollution Prevention Plan (SWPPP) for the Corporation Yard(s)			
Place an X in the boxes below next to implemented SWPPP BMPs to indicate that these BMPs were implemented in applicable instances. If not applicable, type NA in the box. If one or more of the BMPs were not adequately implemented during the reporting fiscal year, then indicate so and explain in the comments section below:				
<input checked="" type="checkbox"/>	Control of pollutant discharges to storm drains such as wash waters from cleaning vehicles and equipment			
<input checked="" type="checkbox"/>	Routine inspection prior to the rainy seasons of corporation yard(s) to ensure non-stormwater discharges have not entered the storm drain system			
<input checked="" type="checkbox"/>	Containment of all vehicle and equipment wash areas through plumbing to sanitary or another collection method			
<input checked="" type="checkbox"/>	Use of dry cleanup methods when cleaning debris and spills from corporation yard(s) or collection of all wash water and disposing of wash water to sanitary or other location where it does not impact surface or groundwater when wet cleanup methods are used			
<input checked="" type="checkbox"/>	Cover and/or berm outdoor storage areas containing waste pollutants			
Comments: See Attachment C.2f. -Corp Yard Inspection. The Town's sweeping contractor continues to use its state-of-the-art sweeper – see Attachment C.2f.-Sweeper				
If you have a corporation yard(s) that is not an NOI facility, complete the following table for inspection results for your corporation yard(s) or attach a summary including the following information: Do not leave any cells blank.				
Corporation Yard Name	Corp Yard Activities w/ site-specific SWPPP BMPs	Inspection Date ²	Inspection Findings/Results	Date and Description of Follow-up and/or Corrective Actions
Town of Danville Service Center	See CCCSD Inspection report in Attachment C.2.f. – Corp Yard Inspection	Sept. 2020	See CCCSD Inspection report in Attachment C.2.f. – Corp Yard Inspection	See CCCSD Inspection report in Attachment C.2.f. – Corp Yard Inspection

² Minimum inspection frequency is once a year during September.

Section 3 - Provision C.3 Reporting New Development and Redevelopment

C.3.b.iv.(2) ► Regulated Projects Reporting

Fill in attached table **C.3.b.iv.(2)** or attach your own table including the same information.

C.3.e.iv. ► Alternative or In-Lieu Compliance with Provision C.3.c.

Is your agency choosing to require 100% LID treatment onsite for all Regulated Projects and not allow alternative compliance under Provision C.3.e.?	<input type="checkbox"/>	Yes	<input checked="" type="checkbox"/>	No
--	--------------------------	-----	-------------------------------------	----

Comments (optional):

C.3.e.v ► Special Projects Reporting

1. In FY 2020-21, has your agency received, but not yet granted final discretionary approval of, a development permit application for a project that has been identified as a potential Special Project based on criteria listed in MRP Provision C.3.e.ii(2) for any of the three categories of Special Projects (Categories A, B or C)?	<input type="checkbox"/>	Yes	<input checked="" type="checkbox"/>	No
---	--------------------------	-----	-------------------------------------	----

2. In FY 2020-21, has your agency granted final discretionary approval to a Special Project? If yes, include the project in both the C.3.b.iv.(2) Table, and the C.3.e.v. Table.	<input type="checkbox"/>	Yes	<input checked="" type="checkbox"/>	No
--	--------------------------	-----	-------------------------------------	----

If you answered "Yes" to either question,
 1) Complete Table C.3.e.v.
 2) Attach narrative discussion of 100% LID Feasibility or Infeasibility for each project.

C.3.h.v.(2) ► Reporting Newly Installed Stormwater Treatment Systems and HM Controls (Optional)

On an annual basis, before the wet season, provide a list of newly installed (installed within the reporting year) stormwater treatment systems and HM controls to the local mosquito and vector control agency and the Water Board. The list shall include the facility locations and a description of the stormwater treatment measures and HM controls installed.

See the attached Table C.3.h.v.(2) for a list of newly installed Stormwater Treatment Systems/HM Controls

The CCCWP compiles the information provided by each Permittee and annually submits the information to the Contra Costa Mosquito and Vector Control District (CCMVCD) on behalf of all Permittees by the September 30 deadline

C.3.h.v.(3)(a) –(c) and (f) ▶ Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspection Program Reporting

Site Inspections Data	Number/Percentage
Total number of Regulated Projects (including offsite projects, and Regional Projects) in your agency's database or tabular format at the end of the previous fiscal year (FY19-20)	26
Total number of Regulated Projects (including offsite projects, and Regional Projects) in your agency's database or tabular format at the end of the reporting period (FY 20-21)	26
Total number of Regulated Projects (including offsite projects, and Regional Projects) for which O&M verification inspections were conducted during the reporting period (FY 20-21)	5
Percentage of the total number of Regulated Projects (including offsite projects, and Regional Projects) inspected during the reporting period (FY 20-21)	20% ³

C.3.h.v.(3)(d)-(e) ▶ Installed Stormwater Treatment Systems Operation and Maintenance Verification Inspection Program Reporting

Provide a discussion of the inspection findings for the year and any common problems encountered with various types of treatment systems and/or HM controls. This discussion should include a general comparison to the inspection findings from the previous year.

Summary:

Continuing education for the property owners to understand the importance in maintaining the vegetation in the IMP. Provide direction for individual homeowners to properly maintain IMP, while having them understand the obligation of the O&M attached to the property. On one site the irrigation system malfunction and vegetation has died. The Town is presently working with the HOA's landscape contractor to remedy the problem. IMPs in higher trash areas in the downtown continue to do well at capturing trash.

³ Based on the number of Regulated Projects in the database or tabular format at the end of the previous fiscal year, per MRP Provision C.3.h.ii.(6)(b).

Provide a discussion of the effectiveness of the O&M Program and any proposed changes to improve the O&M Program (e.g., changes in prioritization plan or frequency of O&M inspections, other changes to improve effectiveness program).

Summary:

The methodology of counting projects (20%/year) for reporting purposes is not well defined in the MRP. There could be an abnormal amount of IMP inspections each year when a development project (no matter how many IMPs are in it, or whether each lot has their own IMP or just one for an entire project is approved, it can drastically throw off the count). Danville has been advocating a change in this methodology since MRP 2.0 was adopted.

C.3.i. ► Required Site Design Measures for Small Projects and Detached Single Family Home Projects

On an annual basis, discuss the implementation of the requirements of Provision C.3.i, including ordinance revisions, permit conditions, development of standard specifications and/or guidance materials, and staff training.

Summary:

Applicants for development approvals for projects creating or replacing more than 2,500 square feet but less than 10,000 square feet of impervious area, and single-family homes creating or replacing more than 2,500 square feet of impervious area, are required to submit a Stormwater Control Plan for a Small Land Development Project that meets the criteria in Appendix C of the Contra Costa Clean Water Program's *Stormwater C.3 Guidebook*. Appendix C includes minimum specifications for runoff reduction measures.

BASMAA prepared standard specifications in four fact sheets regarding the site design measures listed in Provision C.3.i, as a resource for Permittees. The Contra Costa Clean Water Program adopted a December 1, 2012, addendum to the *Stormwater C.3 Guidebook*, 6th Edition, which the Town has adopted and utilizes for all such applications. The addendum, "Preparing a Stormwater Control Plan for a Small Land Development Project," includes step-by-step instructions, a project data form, and standard specifications for runoff reduction measures. The Town of Danville's stormwater ordinance requires all applications for development approvals comply with the MRP and the most recent version of the *Stormwater C.3 Guidebook*. Danville modified local policies/procedures and forms/checklists to require all applicable projects approved after December 1, 2012 to implement at least one of the site design measures listed in Provision C.3.i. We are using the following Program and BASMAA products for C.3.i implementation:

- BASMAA's site design fact sheets
- The countywide program's checklist
- C.3.i guidance provided by the countywide program

As new staff is employed at the Town of Danville, they are trained on the C.3 regulations. This year, one new planner was trained, including how to review and approve the C.3 Small Land Development Projects, and how that process differs from regular C.3 regulated projects. Continued education for all staff is helpful to make sure the approval process for all C.3 projects is followed. This is accomplished one-on-one on a personal basis to review individual projects.

C.3.j.i.(5)(d) ► Green Infrastructure Outreach

On an annual basis, provide a summary of your agency's outreach and education efforts pertaining to Green Infrastructure planning and implementation.

Summary:

Town stormwater and Engineering staff attended the C.3 Green Infrastructure Planning Workshop, which was put on by the CCCWP. It included instruction on preparation of Green Infrastructure Plans for Permittee staff and a review of materials created by CCCWP to assist the Permittees in preparing their Green Infrastructure Plans, as well as a panel discussion.

The CIP process includes coordination by representatives from several departments to review, update, recommend and include new infrastructure projects each year. Members of the internal CIP group have been educated on the meaning of and requirements for Green Infrastructure. In addition, Green Infrastructure planning was discussed at the Engineering Division staff meeting where members could receive information and ask questions.

The list of potential GI projects in the Town's CIP was reviewed and updated for FY 2020/21 and presented to the Town Council at a public hearing and approved. Since adoption of the CIP, additional GI projects were identified by the Stormwater Manager and the City Engineer through the UrbanSim modeling process. Several additional projects that have potential for GI were selected to be included in the Town's GI Plan. These projects are primarily GI projects to be considered for future years. The City Engineer will add these projects in the following years. In addition, the City Engineer proposes to add \$10,000/year to a fund for GI improvements. It is intended to accumulate monies over several years and use them to enhance a CIP with green infrastructure.

The Town's Green Infrastructure Plan was reviewed publicly noticed meetings to review, discuss and receive input. It was reviewed at a Town Council Study Session and heard at a Town Council regularly scheduled meeting. The Danville Green Infrastructure Plan document can be found at: <http://www.ci.danville.ca.us/DocumentCenter/View/3341/Danville-Green-Infrastructure-Plan-PDF>

Please refer to the CCCWP's FY 20-21 Annual Report for a summary of outreach efforts implemented at the countywide level.

C.3.j.ii.(2) ► Early Implementation of Green Infrastructure Projects

On an annual basis, submit a list of green infrastructure projects, public and private, that are already planned for implementation during the permit term and infrastructure projects planned for implementation during the permit term that have potential for green infrastructure measures. Include the following information:

- A summary of planning or implementation status for each public and private green infrastructure project that is not also a Regulated Project as defined in Provision C.3.b.ii. (see C.3.j.ii.(2) Table B - Planned Green Infrastructure Projects).
- A summary of how each public infrastructure project with green infrastructure potential will include green infrastructure measures to the maximum extent practicable during the permit term. For any public infrastructure project where implementation of green infrastructure measures is not practicable, submit a brief description of the project and the reasons green infrastructure measures were impracticable to implement (see C.3.j.ii.(2) Table A - Public Projects Reviewed for Green Infrastructure).

Background Information:
 Describe how this provision is being implemented by your agency, including the process used by your agency to identify projects with potential for green infrastructure, if applicable.

Town staff initially utilized the BASMAA May 6, 2016, document, "Guidance for Identifying Green Infrastructure Potential in Municipal Capital Improvement Projects" to determine what current projects may be eligible to become GI projects. The CCCWP program previously conducted a GIS study to find potential GI projects for the Stormwater Resource Plan throughout the County. Danville Stormwater staff reviewed this list of hundreds of projects for potential inclusion and/or re-prioritization in our GI Plan. A few new projects were identified during this process that may be considered for inclusion in future years. Also, this list was compared to the Capital Improvement Projects (CIP) list which casts a broad net on many potential CIP projects. The CIP list will be re-reviewed as the process continues each fiscal year.

Summary of Planning or Implementation Status of Identified Projects:
 See attached Tables C.3.j.ii.(2)-A and C.3.j.ii.(2)-B for the required information, and any additional notes provided here.

C.3.j.iii.(2) and (3) ► Participate in Processes to Promote Green Infrastructure

On an annual basis, report on the goals and outcomes during the reporting year of work undertaken to participate in processes to promote green infrastructure.

Please see section C.3.j.i.(5)(d) ► Green Infrastructure Outreach above for similar information. The CIP process each year begins in December with monthly meetings to March when a draft of the CIP gets prepared. By April, the Town Council begins conducting public study sessions on the CIP and the Town's budget. These two documents are scheduled for public hearings in May for concurrent adoption.

Please refer to CCCWP's FY 20-21 Annual Report for a summary of efforts conducted to help regional, state, and Federal agencies plan, design, and fund incorporation of green infrastructure measures into local infrastructure projects, including transportation projects.

C.3.j.iv.(2) and (3) ► Tracking and Reporting Progress

On an annual basis, report progress on development and implementation of methods to track and report implementation of green infrastructure measures and provide reasonable assurance that wasteload allocations for TMDLs are being met.

Please refer to CCCWP's FY 20-21 Annual Report for a summary of methods being developed to track and report implementation of green infrastructure measures.

C.3.b.iv.(2) ► Regulated Projects Reporting Table (part 1) – Projects Approved During the Fiscal Year Reporting Period

Project Name Project No.	Project Location ⁴ , Street Address	Name of Developer	Project Phase No. ⁵	Project Type & Description ⁶	Project Watershed ⁷	Total Site Area (Acres)	Total Area of Land Disturbed (Acres)	Total New Impervious Surface Area (ft ²) ⁸	Total Replaced Impervious Surface Area (ft ²) ⁹	Total Pre- Project Impervious Surface Area ¹⁰ (ft ²)	Total Post- Project Impervious Surface Area ¹¹ (ft ²)
Private Projects											
Rivers Lane 1485 Lawrence Road, SD 9543	1485 Lawrence Road	The Address Company	NA	Five parcels, single family homes	Alamo -Tassajara Creek	4.97	4.54	48,558	2,246	14,307	50,804
1475 Lawrence Road, MS 851-20	1475 Lawrence Road	Haven Development		four parcels, single family homes	Alamo Creek	5.2	4.5	108,002	0	28,540	108,002

⁴Include cross streets

⁵If a project is being constructed in phases, indicate the phase number and use a separate row entry for each phase. If not, enter "NA".

⁶Project Type is the type of development (i.e., new and/or redevelopment). Example descriptions of development are: 5-story office building, residential with 160 single-family homes with five 4-story buildings to contain 200 condominiums, 100 unit 2-story shopping mall, mixed use retail and residential development (apartments), industrial warehouse.

⁷State the watershed(s) in which the Regulated Project is located. Downstream watershed(s) may be included, but this is optional.

⁸All impervious surfaces added to any area of the site that was previously existing pervious surface.

⁹All impervious surfaces added to any area of the site that was previously existing impervious surface.

¹⁰For redevelopment projects, state the pre-project impervious surface area.

¹¹For redevelopment projects, state the post-project impervious surface area.

C.3.b.iv.(2) ► Regulated Projects Reporting Table (part 1) – Projects Approved During the Fiscal Year Reporting Period

Project Name Project No.	Project Location ⁴ , Street Address	Name of Developer	Project Phase No. ⁵	Project Type & Description ⁶	Project Watershed ⁷	Total Site Area (Acres)	Total Area of Land Disturbed (Acres)	Total New Impervious Surface Area (ft ²) ⁸	Total Replaced Impervious Surface Area (ft ²) ⁹	Total Pre-Project Impervious Surface Area ¹⁰ (ft ²)	Total Post-Project Impervious Surface Area ¹¹ (ft ²)
Rivers Lane 1485 Lawrence Road, SD 9543	1485 Lawrence Road	The Address Company	NA	Five parcels, single family homes	Alamo -Tassajara Creek	4.97	4.54	48,558	2,246	14,307	50,804
1475 Lawrence Road, MS 851-20	1475 Lawrence Road	Haven Development		four parcels, single family homes	Alamo Creek	5.2	4.5	108,002	0	28,540	108,002
Public Projects											
Comments:											

**C.3.b.iv.(2) ► Regulated Projects Reporting Table (part 2) –
 Projects Approved During the Fiscal Year Reporting Period
 (private projects)**

Project Name Project No.	Application Deemed Complete Date ¹²	Application Final Approval Date ¹³	Source Control Measures ¹⁴	Site Design Measures ¹⁵	Treatment Systems Approved ¹⁶	Type of Operation & Maintenance Responsibility Mechanism ¹⁷	Hydraulic Sizing Criteria ¹⁸	Alternative Compliance Measures ^{19/20}	Alternative Certification ²¹	HM Controls ^{22/23}
Private Projects										

¹²For private projects, state project application deemed complete date. If the project did not go through discretionary review, report the building permit issuance date.

¹³For private projects, state project application final discretionary approval date. If the project did not go through discretionary review, report the building permit issuance date.

¹⁴List source control measures approved for the project. Examples include: properly designed trash storage areas; storm drain stenciling or signage; efficient landscape irrigation systems; etc.

¹⁵List site design measures approved for the project. Examples include: minimize impervious surfaces; conserve natural areas, including existing trees or other vegetation, and soils; construct sidewalks, walkways, and/or patios with permeable surfaces, etc.

¹⁶List all approved stormwater treatment system(s) to be installed onsite or at a joint stormwater treatment facility (e.g., flow through planter, bioretention facility, infiltration basin, etc.).

¹⁷List the legal mechanism(s) (e.g., O&M agreement with private landowner; O&M agreement with homeowners' association; O&M by public entity, etc...) that have been or will be used to assign responsibility for the maintenance of the post-construction stormwater treatment systems.

¹⁸See Provision C.3.d.i. "Numeric Sizing Criteria for Stormwater Treatment Systems" for list of hydraulic sizing design criteria. Enter the corresponding provision number of the appropriate criterion (i.e., 1.a., 1.b., 2.a., 2.b., 2.c., or 3).

¹⁹For Alternative Compliance at an offsite location in accordance with Provision C.3.e.i.(1), on a separate page, give a discussion of the alternative compliance site including the information specified in Provision C.3.b.iv.(2)(m)(i) for the offsite project.

²⁰For Alternative Compliance by paying in-lieu fees in accordance with Provision C.3.e.i.(2), on a separate page, provide the information specified in Provision C.3.b.iv.(2)(m)(ii) for the Regional Project.

²¹Note whether a third party was used to certify the project design complies with Provision C.3.d.

²²If HM control is not required, state why not.

²³If HM control is required, state control method used (e.g., method to design and size device(s) or method(s) used to meet the HM Standard, and description of device(s) or method(s) used, such as detention basin(s), bioretention unit(s), regional detention basin, or in-stream control).

**C.3.b.iv.(2) ► Regulated Projects Reporting Table (part 2) –
 Projects Approved During the Fiscal Year Reporting Period

²⁴For public projects, enter the plans and specifications approval date.

²⁵List source control measures approved for the project. Examples include: properly designed trash storage areas; storm drain stenciling or signage; efficient landscape irrigation systems; etc.

²⁶List site design measures approved for the project. Examples include: minimize impervious surfaces; conserve natural areas, including existing trees or other vegetation, and soils; construct sidewalks, walkways, and/or patios with permeable surfaces, etc.

²⁷List all approved stormwater treatment system(s) to be installed onsite or at a joint stormwater treatment facility (e.g., flow through planter, bioretention facility, infiltration basin, etc.).

²⁸List the legal mechanism(s) (e.g., maintenance plan for O&M by public entity, etc.) that have been or will be used to assign responsibility for the maintenance of the post-construction stormwater treatment systems.

²⁹See Provision C.3.d.i. "Numeric Sizing Criteria for Stormwater Treatment Systems" for list of hydraulic sizing design criteria. Enter the corresponding provision number of the appropriate criterion (i.e., 1.a., 1.b., 2.a., 2.b., 2.c., or 3).

³⁰For Alternative Compliance at an offsite location in accordance with Provision C.3.e.i.(1), on a separate page, give a discussion of the alternative compliance site including the information specified in Provision C.3.b.iv.(2)(m)(i) for the offsite project.

³¹For Alternative Compliance by paying in-lieu fees in accordance with Provision C.3.e.i.(2), on a separate page, provide the information specified in Provision C.3.b.iv.(2)(m)(ii) for the Regional Project.

³²Note whether a third party was used to certify the project design complies with Provision C.3.d.

³³If HM control is not required, state why not.

³⁴If HM control is required, state control method used (e.g., method to design and size device(s) or method(s) used to meet the HM Standard, and description of device(s) or method(s) used, such as detention basin(s), bioretention unit(s), regional detention basin, or in-stream control).

C.3.h.v.(2). ► Table of Newly Installed³⁵ Stormwater Treatment Systems and Hydromodification Management (HM) Controls (Optional)

Fill in table below or attach your own table including the same information

Name of Facility	Address of Facility	Party Responsible ³⁶ For Maintenance	Type of Treatment/HM Control(s)
NA	NA	NA	NA

³⁵ "Newly Installed" includes those facilities for which the final installation inspection was performed during this reporting year.

³⁶State the responsible operator for installed stormwater treatment systems and HM controls.

C.3.e.v.Special Projects Reporting Table												
Reporting Period – July 1 2020 - June 30, 2021												
Project Name & No.	Permittee	Address	Application Submittal Date ³⁷	Status ³⁸	Description ³⁹	Site Total Acreage	Gross Density DU/Acre	Density FAR	Special Project Category ⁴⁰	LID Treatment Reduction Credit Available ⁴¹	List of LID Stormwater Treatment Systems ⁴²	List of Non-LID Stormwater Treatment Systems ⁴³
Name of the Special Project and Project No. (if applicable)	Name of the Permittee in whose jurisdiction the Special Project will be built	Address of the Special Project; if no street address, state the cross streets	See footnote	See footnote	See footnote	Total site area in acres	Number of dwelling units per acre.	Floor Area Ratio	Category A: Category B: Category C: Location: Density: Parking: See footnote	Category A: Category B: Category C: Location: Density: Parking: See footnote	Indicate each type of LID treatment system and % of total runoff treated. See footnote	Indicate each type of non-LID treatment system and % of total runoff treated. Indicate whether minimum design criteria met or certification received See footnote
There are no "Special Projects in the Town of Danville to report												

³⁷Date that a planning application for the Special Project was submitted.

³⁸ Indicate whether final discretionary approval is still pending or has been granted, and provide the date or version of the project plans upon which reporting is based.

³⁹Type of project (commercial, mixed-use, residential), number of floors, number of units, type of parking, and other relevant information.

⁴⁰ For each applicable Special Project Category, list the specific criteria applied to determine applicability. For each non-applicable Special Project Category, indicate n/a.

⁴¹For each applicable Special Project Category, state the maximum total LID Treatment Reduction Credit available. For Category C Special Projects also list the individual Location, Density, and Minimized Surface Parking Credits available.

⁴² List all LID stormwater treatment systems proposed. For each type, indicate the percentage of the total amount of runoff identified in Provision C.3.d. for the Special Project's drainage area.

⁴³List all non-LID stormwater treatment systems proposed. For each type of non-LID treatment system, indicate: (1) the percentage of the total amount of runoff identified in Provision C.3.d. for the Special Project's drainage area, and (2) whether the treatment system either meets minimum design criteria published by a government agency or received certification issued by a government agency, and reference the applicable criteria or certification.

FY 2020 - 2021 Annual Report
Permittee Name: Danville

C.3 – New Development and Redevelopment

Special Projects Narrative

Permittee Name: Danville

C.3.j.ii.(2) ► Table A - Public Projects Reviewed for Green Infrastructure

Project Name and Location ⁴⁴	Project Description	Status ⁴⁵	GI Included? ⁴⁶	Description of GI Measures Considered and/or Proposed or Why GI is Impracticable to Implement ⁴⁷
Hap Magee Park	Capture and treat CalTrans run-off in existing ditch adjacent to highway.	TBD – field recon done	TBD	TBD
510 La Gonda Way	This project was modified since last reviewed – now there will not be an expansion. However, parking lot run-off may be able to be captured for detention and infiltration at the rear of the site.	TBD – field recon done	TBD	If the Town sell this property, the construction of LID's are possible depending on the development of the property.
Oak Hill Park	Possible inclusion of LID if park improvements are considered in the future.	TBD	TBD	TBD
Green Valley School parking lot	Possible inclusion of LID if parking lot improvements are considered in the future	TBD	TBD	TBD – This project was identified through the UrbanSim modeling exercise.
Danville South Park	Possible inclusion of LID if park improvements are considered in the future by capturing street run-off and directing it to LID facilities.	TBD	TBD	TBD – This project was identified through the UrbanSim modeling exercise.
Sycamore Valley Park	Possible inclusion of LID if park improvements are considered in the future by capturing street run-off and directing it to LID facilities.	TBD	TBD	TBD – This project was identified through the UrbanSim modeling exercise.

⁴⁴ List each public project that is going through your agency's process for identifying projects with green infrastructure potential.

⁴⁵ Indicate status of project, such as: beginning design, under design (or X% design), projected completion date, completed final design date, etc.

⁴⁶ Enter "Yes" if project will include GI measures, "No" if GI measures are impracticable to implement, or "TBD" if this has not yet been determined.

⁴⁷ Provide a summary of how each public infrastructure project with green infrastructure potential will include green infrastructure measures to the maximum extent practicable during the permit term. If review of the project indicates that implementation of green infrastructure measures is not practicable, provide the reasons why green infrastructure measures are impracticable to implement.

FY 2020 - 2021 Annual Report

C.3 – New Development and Redevelopment

Permittee Name: Danville

Greenbrook Elementary	Possible inclusion of LID if parking lot improvements are considered in the future	TBD	TBD	TBD – This project was identified through the UrbanSim modeling exercise.
Railroad Avenue Parking Lot	Possible inclusion of LID if parking lot improvements are considered in the future	TBD	TBD	TBD – This project was identified through the UrbanSim modeling exercise.
Clocktower Parking Lot	Possible inclusion of LID if parking lot improvements are considered in the future	TBD	TBD	TBD – This project was identified through the UrbanSim modeling exercise.
Library and Community Center	Possible inclusion of LID if park improvements are considered in the future by capturing street run-off and directing it to LID facilities.	TBD	TBD	TBD – This project was identified through the UrbanSim modeling exercise.
Diablo Freeway Interchange	Possible inclusion of LID if Caltrans allowed street run-off to be treated on their property in the cloverleaf while enhancing the landscaping at the interchange.	TBD	TBD	TBD – This project has been in the Town's CIP as a landscape project.
Sycamore Freeway Interchange	Possible inclusion of LID if Caltrans allowed street run-off to be treated on their property in the cloverleaf while enhancing the landscaping at the interchange.	TBD	TBD	TBD – This project has been in the Town's CIP as a landscape project.

C.3.j.ii.(2) ► Table B - Planned and/or Completed Green Infrastructure Projects

FY 2020 - 2021 Annual Report

C.3 – New Development and Redevelopment

Permittee Name: Danville

Project Name and Location ⁴⁸	Project Description	Planning or Implementation Status	Green Infrastructure Measures Included
Bret Harte Park	Feasibility Study	CIP-574	Review of area to evaluate Green Infrastructure possibilities
Bret Harte Park Phase II – intersection of Diablo Road and Camino Tassajara	Retrofit existing parking lot and park area with porous pavement and/or LID.	It is CIP #B-574 - \$33,719 is budgeted. Date to begin project FY 2020-21.	Porous pavement and/or possibility of LID features
Sycamore Valley Park Site Study	Preparation of a Park study to evaluate facility needs	It is CIP #B-479 but is currently unfunded.	As Park site needs study is evaluated, potential LID improvement could be considered.
Please refer to Green Infrastructure Plan Map Attachment C.3.j.ii.(2) - Danville GI Plan - Public Projects			

⁴⁸ List each planned (and expected to be funded) public and private green infrastructure project that is not also a Regulated Project as defined in Provision C.3.b.ii. Note that funding for green infrastructure components may be anticipated but is not guaranteed to be available or sufficient.

Section 4 – Provision C.4 Industrial and Commercial Site Controls

Program Highlights and Evaluation

Highlight/summarize activities for reporting year:

Summary:

The Town of Danville contracts with Central Contra Costa Sanitary District (CCCCSD) for business inspections annually. Town staff reviews the inspection program with CCCSD district staff to coordinate inspections and address any new items that the Town wants addressed. CCCSD provides effective prompt service for callouts when field issues/observations arise or when Town staff receive complaints. Typical response time is usually within one day. The CCCSD business list is reviewed, updated, and prioritized yearly. The schedule and pace of inspections is also reviewed, and because of Covid-19 SIP mandated orders it appears we are slightly behind schedule. Once restrictions are lifted inspections will take place again.

Town Economic Development staff continue to update and produce a list of businesses that are new or relocated. This updated list is forwarded to CCCSD which they use to update CCCSD's data base. This information helps to better determine the correct number and type of businesses that need inspections in Danville. The new accounting of business changes is proving to be a great resource for our Business Inspection program. The Town's stormwater inspector previously attended the 5/11/21 Inspection Workshop training in Contra Costa County this year. In addition, CCCSD inspectors also received training per Attachment C.4.e. - POTW Training.

Town staff voluntarily participates in the Commercial/Industrial MOC Workgroup of the CCCWP in addition to other committees. Also, please refer to the C.4. Industrial and Commercial Site Controls section of the CCCWP's FY 20-21 Annual Report for a description of activities of the countywide program.

C.4.b.iii ► Potential Facilities List (i.e., List of All Facilities Requiring Stormwater Inspections)

List below or attach your list of industrial and commercial facilities in your Inspection Plan to inspect that could reasonably be considered to cause or contribute to pollution of stormwater runoff.

See Attachment C.4.b.iii. - Danville FY20-21 Inventory. When Town staff met with CCCSD and CCCWP staff to prepare the Business Inspection Plan, a few years ago, inspections were originally planned at a rate that exceeds one inspection per business per 5-year term. This also allows for extra inspections to ensure follow-up enforcement inspections. Based on the number of inspections conducted this 5-year permit term, inspections are ahead of schedule.

C.4.d.iii.(2)(a) & (c) ▶ Facility Inspections

Fill out the following table or attach a summary of the following information. Indicate your reporting methodology below.

<input checked="" type="checkbox"/>	Permittee reports multiple discrete potential and actual discharges at a site as one enforcement action.
<input type="checkbox"/>	Permittee reports the total number of discrete potential and actual discharges on each site.

	Number
Total number of inspections conducted (C.4.d.iii.(2)(a))	25
Violations, enforcement actions, or discrete number of potential and actual discharges resolved within 10 working days or otherwise deemed resolved in a longer but still timely manner (C.4.d.iii.(2)(c))	0
Comments: All enforcement actions for potential/actual discharges were resolved within 10 days.	

C.4.d.iii.(2)(b) ▶ Frequency and Type of Enforcement Conducted

Fill out the following table or attach a summary of the following information. **Do not leave any cells blank Provide a brief description of each enforcement action level (e.g., verbal warning, notice of violation, legal action, etc.).**

	Enforcement Action (as listed in ERP) ⁴⁹	Number of Enforcement Actions Taken
Level 1		
Level 2		
Level 3		
Level 4		
Total		0

⁴⁹Agencies to list specific enforcement actions as defined in their ERPs.

C.4.d.iii.(2)(d) ► Frequency of Potential and Actual Non-stormwater Discharges by Business Category

Fill out the following table or attach a summary of the following information.

Business Category ⁵⁰	Number of Actual Discharges	Number of Potential Discharges
	0	0

C.4.d.iii.(2)(e) ► Non-Filers

List below or attach a list of the facilities required to have coverage under the Industrial General Permit but have not filed for coverage:

There were no industries identified as non-filers during scheduled inspections during this fiscal year.

C.4.e.iii ► Staff Training Summary

Training Name	Training Dates	Topics Covered	No. of Industrial/ Commercial Site Inspectors in Attendance	Percent of Industrial/ Commercial Site Inspectors in Attendance	No. of IDDE Inspectors in Attendance	Percent of IDDE Inspectors in Attendance
C.4 & C.5 Stormwater Inspection Training Workshop	5/25/21	<ul style="list-style-type: none"> Basics of Routine Inspection Stormwater Regulatory Overview Anatomy of Enforcement Inspection Photo Review Jurisdictional Clarity 	* Town of Danville Employees:2	* Town of Danville Employees: 100%	2	100%
		Attachment C.4.e. - POTW Training Summary 20-21				

⁵⁰List your Program's standard business categories.

Comments:

*Please See Attachment C.4.e. - POTW Training Summary 20-21 for all types of inspection training

Section 5 – Provision C.5 Illicit Discharge Detection and Elimination

Program Highlights and Evaluation

Highlight/summarize activities for reporting year:

Provide background information, highlights, trends, etc.

Summary:

The Town Stormwater Coordinator voluntarily participates in the CCCWP Municipal Operations Committee to keep up to date on current maintenance BMPs and enforcement issues. Please **Refer to the C.5 Illicit Discharge Detection and Elimination section of the CCCWP FY 20-21 Annual Report for a description of activities implemented at the countywide and/or regional level.**

Town Maintenance crews inspect, and hand clear all debris in Town-maintained channels each year. No pesticides are ever used.

C.5.c.iii ► Complaint and Spill Response Phone Number

Summary of any changes made during FY 20-21:

The Spill Response number have been updated to accommodate changes in the Town's organization. See attachment C.5.c.iii Complaint and Spill Response Emergency numbers.

complaint and spill response web address: <https://www.danville.ca.gov/539/Illegal-Dumping-Graffiti>

The public can contact the maintenance, police or engineering departments directly or they can use the "Danville Connect" application too. The call out list of resource agencies for emergency spill response is distributed to each Town maintenance, police and inspector vehicles

C.5.d.iii.(1), (2), (3) ► Spill and Discharge Complaint Tracking

Spill and Discharge Complaint Tracking (fill out the following table or include an attachment of the following information)

	Number
Discharges reported (C.5.d.iii.(1))	11
Discharges reaching storm drains and/or receiving waters (C.5.d.iii.(2))	0
Discharges resolved in a timely manner (C.5.d.iii.(3))	11
Comments:	

Comments:

Most of the reports are received by citizens over the phone, through the Town's "Danville Connect" on-line service request system, by police or by staff observations. Generally, complaints are routed to the appropriate person/department to be dealt with as soon as possible. Sometimes a coordinated enforcement response is necessary by utilizing the Town's Maintenance Department, Code Enforcement Officer and/or the Town's Stormwater Coordinator depending on the situation. When non-stormwater pollutants could potentially discharge into the drainage system, an immediate clean-up is required, the site is monitored as the clean-up is occurring. Letters and/or follow-up enforcement and education is conducted to resolve the problem in a timely manner so that it will not happen again.

The Town utilizes a Customer Relationship Management (CRM) on-line system which allows the public to inform staff of concerns or potential hazards when they see them. It also provides staff with a comprehensive electronic system to track all maintenance work orders. The CRM assists our pollution prevention efforts by allowing residents to quickly report issues and by serving as a systematic, detailed tracking system. For example, in 2020/21 Fiscal Year:

- Spills: 4 traffic accidents were cleaned up
- Illegal Dumping: Staff responded to 41 instances of illegal dumping.
- Creek Maintenance: 20 work orders entered, with work primarily consisting of manual removal of obstructions from flow lines.
- Drain inlets: Inspected 506 drain inlets and cleaned as needed, removing 22 cubic yards of debris.
- Curb Miles Swept: 7,174 swept throughout Town.

Maintenance staff reports that of the illicit dumping that they clean up, it is a variety of different types of debris mainly furniture, some appliances, and general trash that are dumped along street shoulders. For a typical example of how a complaint is handled please refer to Attachment C.5.d.iii Spill and Discharge Complaint Tracking for more information, illegal dumping incidents were only included in the C.2 section of this report. In the last three years, they are included in both sections.

All the discharges reported were substantiated in the field and resolved in a timely manner. Most of the incidents were due to dumpster/trash issues and construction/landscape debris. One complaint led to a business inspection where a warning notice was issued.

Section 6 – Provision C.6 Construction Site Controls

C.6.e.iii.(3)(a), (b), (c), (d) ▶ Site/Inspection Totals			
Number of active Hillside Sites (sites disturbing < 1 acre of soil requiring storm water runoff quality inspection) (C.6.e.iii.3.a)	Number of High Priority Sites (sites disturbing < 1 acre of soil requiring storm water runoff quality inspection) (C.6.e.iii. 3.c)	Number of sites disturbing ≥ 1 acre of soil (C.6.e.iii.3.b)	Total number of storm water runoff quality inspections conducted (include only Hillside Sites, High Priority Sites and sites disturbing 1 acre or more) (C.6.e.iii. 3.d)
2	2	8	160
Comments: Out of the four sites over one acre – Construction activities were limited to SIP Covid-19.			
Provide the number of inspections that are conducted at sites not within the above categories as part of your agency's inspection program and a general description of those sites, if available or applicable. 35 additional inspections were conducted including small sites with minor slide repairs or construction of single-family homes			

C.6.e.iii.(3)(e) ► Construction Related Storm Water Enforcement Actions

	Enforcement Action (as listed in ERP) ⁵¹	Number Enforcement Actions Issued
Level 1 ⁵²	Verbal	4 Erosion control incomplete for SFR
Level 2	Written	3 Erosion control incomplete for SFR
Level 3	Formal Enforcement	2 Erosion control incomplete for SFR
Level 4	Legal Action	0
Total		9

C.6.e.iii.(3)(f), ► Illicit Discharges

	Number
Number of illicit discharges, actual and those inferred through evidence at hillside sites, high priority sites and sites that disturb 1 acre or more of land (C.6.e.iii. 3.f)	0

C.6.e.iii.(3)(g) ► Corrective Actions

Indicate your reporting methodology below.

<input checked="" type="checkbox"/>	Permittee reports multiple discrete potential and actual discharges at a site as one enforcement action.
<input type="checkbox"/>	Permittee reports the total number of discrete potential and actual discharges on each site.

	Number
Enforcement actions or discrete potential and actual discharges fully corrected within 10 business days after violations are discovered or otherwise considered corrected in a timely period (C.6.e.iii. .3.g)	1

Comments:
 Several incidental enforcement actions (not counted here) are verbal warnings for site maintenance issues that were corrected the same day.

⁵¹Agencies should list the specific enforcement actions as defined in their ERPs.
⁵²For example, Enforcement Level 1 may be Verbal Warning.

C.6.e.iii.(4) ► Evaluation of Inspection Data

Describe your evaluation of the tracking data and data summaries and provide information on the evaluation results (e.g., data trends, typical BMP performance issues, comparisons to previous years, etc.).

Description:

The Town's grading inspector catalogs inspection data in daily journals. Most inspections include observations on site maintenance and to ensure that sites are ready for Storm Water events. Installation of C.3 improvements are inspected at various intervals of construction and require sign-off by an inspector before proceeding to the next construction step. Inspectors will continue to utilize the Town's C.3 Construction Inspection Checklist for each stage of construction for C.3 facilities. The checklist is a very helpful tool for each stage of construction. The contractor and staff know what is expected and how to plan for upcoming inspections.

The Town's goal is to continue to review and implement an electronic inspection reporting system. Inspectors are able to use previously purchased iPads for field inspections utilizing a fillable C.3 Construction Inspection Checklist for each stage of construction. Also, refer to the C.6 Construction Site Control section of CCCWP's FY 20-21 Annual Report for a description of activities at the countywide or regional level

C.6.e.iii.(4) ► Evaluation of Inspection Program Effectiveness

Describe what appear to be your program's strengths and weaknesses, and identify needed improvements, including education and outreach.

Description:

The Town has developed a consistent format for site inspections. This is a work in progress as most of the Town's inspection staff has retired.

The attitude of contractors to comply with erosion control and other stormwater requirements has improved over past years. Typically, private companies e.g., SWIMS are hired specifically for site management and stormwater control on larger project sites. In general, it is the smaller contractors on small single-family residences that require significantly more staff attention and monitoring of site BMPs.

As stated above, it is the Town's goal to implement a more electronic inspection reporting system in the upcoming year. Also, refer to the C.6 Construction Site Control section of CCCWP's FY 20-21 Annual Report for a description of activities at the countywide or regional level.

LID and construction BMP training has always been helpful each year. In addition, the Town has begun to implement a program to re-visit how construction projects turn out after they are built. Planning and Engineering staff were invited to a group visit of a project site after it was built to see what issues we did good and what we could have done better.

Refer to the C.6 Construction Site Control section of CCCWP's FY 20-21 Annual Report for a description of activities at the countywide or regional level.

C.6.f.iii ▶ Staff Training Summary

Training Name	Training Dates	Topics Covered	No. of Inspectors in Attendance
C.4 & C.5 Stormwater Inspection Training Workshop	5/25/21	<ul style="list-style-type: none"> • Basics of Routine Inspection • Stormwater Regulatory Overview • Anatomy of Enforcement • Inspection Photo Review Jurisdictional Clarity	* Town of Danville Employees:2

Section 7 – Provision C.7. Public Information and Outreach

C.7.b.i.1 ► Outreach Campaign

Summarize outreach campaign. Include details such as messages, creative developed, and outreach media used. The detailed outreach campaign report may be included as an attachment. If outreach campaign is being done by participation in a countywide or regional program, refer to the separate countywide or regional Annual Report.

Summary:

Refer to the CCCWP FY 20-21 Annual Report

C.7.b.iii.2 ► Post-Campaign Effectiveness Assessment/Evaluation

(For the Annual Report following the post-campaign effectiveness assessment/evaluation) Submit a report of the effectiveness assessment/evaluation completed, which, at a minimum, should include the following information:

- 1) A description of the outreach campaign
- 2) A summary of how the effectiveness assessment/evaluation was implemented
- 3) An analysis of the effectiveness assessment/evaluation results
- 4) A discussion of the measurable changes in awareness and behavior achieved
- 5) A discussion of the planned or future outreach campaigns to influence awareness and behavior changes regarding stormwater runoff pollution prevention messages

If campaign implementation and effectiveness assessment were done Countywide or regionally, refer to a Countywide or regional submittal that contains the information described above.

<input type="checkbox"/>	See attached effectiveness assessment/evaluation report
<input checked="" type="checkbox"/>	See Countywide or regional submittal (reference document)
<input type="checkbox"/>	Effectiveness assessment/evaluation report was included in the FY 19-20 Annual Report

C.7.c. Stormwater Pollution Prevention Education

There were no changes in how the point of contact is publicized and maintained

C.7.d ► Public Outreach and Citizen Involvement Events

Describe general approach to event selection. Provide a list of outreach materials and giveaways distributed.
 Use the following table for reporting and evaluating public outreach events

Event Details	Description (messages, audience)	Evaluation of Effectiveness
Provide event name, date, and location. Indicate if event is local, countywide or regional. Indicate if event is public outreach or citizen involvement.	Identify type of event (e.g., school fair, creek clean-up, storm drain stenciling, farmers market etc.), type of audience (school children, gardeners, homeowners etc.) and outreach messages (e.g., Enviroscene presentation, pesticides, stormwater awareness)	Provide general staff feedback on the event (e.g., success at reaching a broad spectrum of the community, well attended, good opportunity to talk to gardeners etc.). Provide other details such as: <ul style="list-style-type: none"> • Success at reaching a broad spectrum of the community • Number of participants compared to previous years. • Post-event effectiveness assessment/evaluation results • Quantity/volume of materials cleaned up, and comparisons to previous efforts
Bringing Back the Natives Garden Tour: Virtual event took place on four Sundays, April 25, May 2, and May 16 and May 23, 2021 <ul style="list-style-type: none"> • 25 gardens in fifteen cities and 12 native plant nurseries located throughout Alameda and Contra Costa counties were showcased on the Tour's website: https://www.bringingbackthenatives.net/ • More than 2,000 people registered for this event • A virtual tour programming took the place of the in-person tour. The schedule for the three days of programming can be found here. 	Summary of the seventeenth Annual Bringing Back the Natives Garden Tour <ul style="list-style-type: none"> • 2,000 people registered for this event • 25 gardens in fifteen cities were showcased on the Tour's website • A virtual tour programming took the place of the in-person tour. The schedule for the three days of programming can be found here. • In the virtual tour, which took place on April 25, May 2, and May 16 and May 23: <ul style="list-style-type: none"> • Best-selling author and renowned speaker Doug Tallamy was keynote speaker on the first day of the 	There was a decrease in the number of registrants over the usual in-person tour (2,000 vs about 2,400)

	<p>program; he also gave a follow-up presentation and participated in a Q & A session on the second day of the event</p> <ul style="list-style-type: none"> • 25 native plant gardens were visited, live, with the host or designer <p>The schedule for the four days of programming can be found here..</p> <p>The website contains numerous photographs of all of the gardens that have ever been on the tour, extensive garden descriptions, plant lists for each garden, and some garden-specific bird, butterfly, mammal, reptile, and amphibian lists, as well as resource information on how to garden with California natives. The resource information includes contact information for landscaper designers with gardens on the tour, a list of Easy-to-Grow East Bay Natives, lists of nurseries that carry native plants, lists of reference books, "How I got started gardening with native plants" essays by a number of the host gardeners, and more.</p>	
<p>Danville 2021 Earth Day Event was Cancelled this year due to the worldwide pandemic</p>	<p>Typical event activities appealed to people of all ages with booths and activities that encouraged hands-on learning and promoted environmental stewardship including the Friends of San Ramon Creek and EBRPD nature exhibit and guided creek walk.</p>	<p>This event appeals to both young and old. There are many hands-on activities for all ages. Promotional items are given away including reusable shopping bags, rulers, shames, pencils, rechargeable flashlights, flash drives, seeds and school supplies as a reminder and encouragement to continue with the effort for clean water. Educational pamphlets on green gardening tips were also popular.</p>
<p>Danville Bike to Workday –Cancelled due to SIP Covide-19.</p>	<p>Future promotions by the Town of Danville, pro6-Fifteen Cyclery, and Street Smarts will</p>	<p>Reusable bags, free water bottles drinks, trail maps and food are information promotional</p>

	<p>host the event and host a Bike to Work Day Energizer Station along the Iron Horse Trail in the downtown area for this future event.</p>	<p>items that will be available to given away to bikers.</p>
<p>The Town Continues its program to mark all storm drains in Town with curb markers that says, "No Dumping, Drains to Creek." This program began in 1993 with volunteers installing these markers on the drains. The first markers were placed almost 23 years ago. Since the early 2000s, the Town recognized the need to start a replacement program, replacing missing or deteriorated markers each year.</p> <p>Danville Boy Scout Curb Marker projects – Boy Scouts wanting to earn their Eagle Scout award volunteer to install the Town curb markers that remind people not to pollute storm drains. This year, the Town's Stormwater Coordinator worked with a scout to place curb markers on storm drains in town, however, due to SIP and the influences of Covid-19 continuation of the program is suspended until its safe for group activities to continue</p>	<p>Scouts utilize their troop, troop leaders, friends, parents, etc. to execute the project. Many community members (young and adult) are educated on storm drain pollution in the process.</p>	<p>For each curb marker replaced, six flyers are delivered to homes in the surrounding area of the storm drain. GIS is now being utilized to keep track of the Town's curb marker replacement program. Curb marker replacement dates are recorded by neighborhood to better manage this program. This is a helpful long-term tracking tool for maintenance of the Town's curb markers.</p>
<p>refer to the CCCWP's Public Information and Outreach section for a description of events</p>		

C.7.e. ► Watershed Stewardship Collaborative Efforts

Summarize watershed stewardship collaborative efforts and/or refer to a regional report that provides details. Describe the level of effort and support given (e.g., funding only, active participation etc.). State efforts undertaken and the results of these efforts. If this activity is done regionally refer to a regional report.

Evaluate effectiveness by describing the following:

- Efforts undertaken
- Major accomplishments

Summary:

The Town is a member of the Contra Costa Watershed Forum. Also, please refer to the CCCWP's FY 20-21 Annual Report, Section C.7 Public Information and Outreach for a full description and summary of the five regional efforts conducted at the countywide/regional level.

C.7.f. ► School-Age Children Outreach

Summarize school-age children outreach programs implemented. A detailed report may be included as an attachment. Use the following table for reporting school-age children outreach efforts.

Program Details	Focus & Short Description	Number of Students/Teachers reached	Evaluation of Effectiveness
Provide the following information: Name Grade or level (elementary/ middle/ high) Refer to the C.7 Section of the CCCWP FY 20-21 Annual Report for a description of School-age Children Outreach efforts conducted at the countywide level. In addition, add information on any local School-age Children Outreach efforts to this table.	Brief description, messages, methods of outreach used	Provide number or participants	Provide agency staff feedback. Report any other evaluation methods used (quiz, teacher feedback etc.). Attach evaluation summary if applicable.

<p>Kids for the Bay – elementary school Environmental Education Program</p>	<p>A continuation of this program which is the same program that the CCCWP traditionally funds and supports, but in addition, the Town also funds two classrooms each year. The program included a field trip to the Sunol Wilderness, an action project at their school, and four classroom lessons on SF Bay, bay organisms, harmful pesticides, food chains and pollution and environmental health.</p> <p>This program was suspended for this year due to SIP, school remote learning and Covid-19 effects</p>	<p>This program is typically offered in two 5th grade classrooms at Greenbrook Elementary reaching several students, their families and two teachers</p>	<p>No report to submit this year due to SIP and Covid-19 concerns</p>
---	--	--	---

Section 9 – Provision C.9 Pesticides Toxicity Controls

C.9.a. ► Implement IPM Policy or Ordinance					
Is your municipality implementing its IPM Policy/Ordinance and Standard Operating Procedures?			X	Yes	<input type="checkbox"/> No
If no, explain:					
Report implementation of IPM BMPs by showing trends in quantities and types of pesticides used, and <u>suggest reasons for increases in use of pesticides that threaten water quality</u> , specifically organophosphates, pyrethroids, carbamates fipronil, indoxacarb, diuron, and diamides. A separate report can be attached as evidence of your implementation.					
Trends in Quantities and Types of Pesticide Active Ingredients Used⁵³					
Pesticide Category and Specific Pesticide Active Ingredient Used	Amount ⁵⁴				
	FY 16-17	FY 17-18	FY 18-19	FY 19-20	FY 20-21
Organophosphates					
Active Ingredient Chlorpyrifos	0	0	0	0	0
Active Ingredient Diazinon	0	0	0	0	0
Active Ingredient Malathion	0	0	0	0	0
Pyrethroids (see footnote #2 for list of active ingredients)					
Active Ingredient Type X	0	0	0	0	0
Active Ingredient Type Y	0	0	0	0	0
Carbamates					
Active Ingredient Carbaryl	0	0	0	0	0
Active Ingredient Aldicarb	0	0	0	0	0
Fipronil	0	0	0	0	0
Pesticide Category and Specific Pesticide Active Ingredient Used	Amount				

⁵³Includes all municipal structural and landscape pesticide usage by employees and contractors.

⁵⁴Weight or volume of the active ingredient, using same units for the product each year. Please specify units used. The active ingredients in any pesticide are listed on the label. The list of active ingredients that need to be reported in the pyrethroids class includes: metofluthrin, bifenthrin, cyfluthrin, beta-cyfluthrin, cypermethrin, deltamethrin, esfenvalerate, lambdacyhalothrin, and permethrin.

	FY 16-17	FY 17-18	FY 18-19	FY 19-20	FY 20-21
Indoxacarb	0	0	0	0	0
Diuron	0	0	0	0	0
Diamides	0	0	0	0	0
Active Ingredient Chlorantraniliprole	0	0	0	0	0
Active Ingredient Cyantraniliprole	0	0	0	0	0
Reasons for increases in use of pesticides that threaten water quality: N/A there was no increase in use of these pesticides.					
IPM Tactics and Strategies Used: Trapping for rodents, like gophers, moles and voles is the Town's preferred method. For ground squirrels specifically, the populations have been reduced due to monthly inspections and staying on top of the populations. As a result, eradication is less necessary to control these populations. Town landscape contractors continue to follow wind and temperature guidelines. They also use fewer toxic pesticides from the approved School District list, which follows the Healthy School Act requirements as directed by the Town. The pond located at Oak Hill Park is maintained using natural methods for water quality. A freeze-dried microbe is used to minimize algae growth naturally. Alum (made from kelp) treatments are used to clear the water quality. The alum removes the suspension in the water and allows all debris to drop to the bottom of the pond which are then consumed by the microbes, while producing water and oxygen. It has become an exact science on how much to use to balance the pond's ecosystem. The Town has successfully been utilizing this type of natural algae control for approximately 23 years under the direction of the same Town staff person who oversees maintaining the pond's delicate ecosystem. He oversees a licensed aquatic contractor to perform weekly maintenance and applications as needed. The pond is also equipped with an efficient aeration pump system with five air stones at the bottom of the pond and fountain system that works hand in hand with the microbe treatments to maintain clear water quality and enhanced microbial activity. An UV light system is used, and filter continue to effectively treat the water and kill 99.9% of bacteria that maybe in the water.					

C.9.b ▶ Train Municipal Employees	
Enter the number of employees that applied or used pesticides (including herbicides) within the scope of their duties this reporting year.	NA
Enter the number of these employees who received training on your IPM policy and IPM standard operating procedures within this reporting year.	0
Enter the percentage of municipal employees who apply pesticides who have received training in the IPM policy and IPM standard operating procedures within this reporting year.	0, NA
Type of Training: Staff continues to conduct tailgate training sessions on appropriate IPM methods when specific maintenance is required for Town facilities. The Town's contractor also performs weekly meetings with their staff to address safety issues that may come up in the field, involving future treatments. In addition, the Town's contractor attended a PAPA Seminar.	

C.9.c ▶ Require Contractors to Implement IPM			
Did your municipality contract with any pesticide service provider in the reporting year, for either landscaping or structural pest control?	X	Yes	No
If yes, did your municipality evaluate the contractor's list of pesticides and amounts of active ingredients used?	X	Yes	No,

If your municipality contracted with any pesticide service provider, briefly describe how contractor compliance with IPM Policy/Ordinance and SOPs was monitored

Structural pest management is used on only one public building. Staff coordinates with the contractor to make sure that no pesticides used. IPM methods such as Orange oil for ants and removing cobwebs from the exterior of the building for spiders. All other public building pest control is handled by staff with regular cleaning of all facilities by removing cobwebs and if issues arise orange oil used. Contract requirements for rental facilities ensure that all trash is immediately removed after and the space is swept. Structural pest control is contracted out to Bug Zappers who only use IPM techniques like Orange oil. No pesticides are ever utilized around or in Town bldgs.

All weeds in creeks are hand cut by staff and/or contractors. These activities are implemented on approximately 200 acres of parks and 60 acres of roadsides with minimal staffing.

Danville Maintenance staff work with landscape contractors on chemical use both in parks and roadsides. Parks Maintenance Supervisor utilizes an approved chemical list that is developed each year by a joint process with the City of San Ramon, Town of Danville, and San Ramon Valley Unified School District. These are used on parks, roadsides, and joint use school/parks. Specifically, these chemicals are checked against the State's Prop. 65 list of banned chemicals, ones that are listed, are not used, and/or removed from the approved list. The Town strictly adheres to this list. The Town must get approval from SRVUSD for jointly used school/parks if there is a chemical need for special circumstances before it can be used. If the request is denied, then options are researched for viable alternatives.

The Parks Maintenance Supervisor posts chemical usage warnings at the park and school/park sites, performs inspections before and after applications, confirms that Danville follows all State, local regulations and adhere to the Healthy Schools Act. They can respond to any issues that might arise from these applications while providing a consistent messaging for information conveyed to those that inquire about what is being applied.

IPM goals are clearly communicated by the Maintenance Supervisors for the Town of Danville with the landscape contractors and pest control contractors on a regular basis and emphasis is for the least toxic-most effective approach for control.

Trapping and bait stations are used first for rodent control. This is costly and time consuming, so when an explosion in the gopher, ground squirrel and other pest populations occur then least toxic-most effective chemical use is discussed and implemented when needed. Since there is a decline in these populations an evaluation of pesticide use reports over the past years shows a decrease in the material used each year.

Another valuable tool the Town utilizes is the services from an outside specialized turf advisor/consultant are obtained when we are unable to find an effective means of turf management.

C.9.d ▶ Interface with County Agricultural Commissioners				
Did your municipality communicate with the County Agricultural Commissioner to: (a) get input and assistance on urban pest management practices and use of pesticides or (b) inform them of water quality issues related to pesticides,	<input checked="" type="checkbox"/>	Yes	<input type="checkbox"/>	No
If yes, summarize the communication. If no, explain. County Agricultural Commissioner presented on June 15, 2020 Municipal Operations Committee Meeting.				
Did your municipality report any observed or citizen-reported violations of pesticide regulations (e.g., illegal handling and applications of pesticides) associated with stormwater management, particularly the California Department of Pesticide Regulation (DPR) surface water protection regulations for outdoor, nonagricultural use of pyrethroid pesticides by any person performing pest control for hire.	<input type="checkbox"/>	Yes	<input checked="" type="checkbox"/>	No
If yes, provide a summary of improper pesticide usage reported to the County Agricultural Commissioner and follow-up actions taken to correct any violations. A separate report can be attached as your summary.				

C.9.e.ii (1) ▶ Public Outreach: Point of Purchase
Provide a summary of public outreach at point of purchase, and any measurable awareness and behavior changes resulting from outreach (here or in a separate report); OR reference a report of a regional effort for public outreach in which your agency participates.
Summary: See the C.9 Pesticides Toxicity Control section of the CCCWP FY 20-21 Annual Report for information on point of purchase public outreach conducted countywide and regionally.

C.9.e.ii (2) ▶ Public Outreach: Pest Control Contracting Outreach
Provide a summary of outreach to residents who use or contract for structural pest control and landscape professionals); AND/OR reference a report of a regional effort for outreach to residents who hire pest control and landscape professionals in which your agency participates.
Summary: See the C.9 Pesticides Toxicity Control section of the CCCWP FY 20-21 Annual Report for information on point of purchase public outreach conducted countywide and regionally."

C.9.e.ii.(3) ► Public Outreach: Pest Control Operators

Provide a summary of public outreach to pest control operators and landscapers and reduced pesticide use (here or in a separate report); **AND/OR** reference a report of a regional effort for outreach to pest control operators and landscapers in which your agency participates.

Summary:

The Town contracts include language that makes IPM a requirement and the landscape maintenance contractors contracted by the Town are Bay Friendly certified. The Town's Maintenance Services supervisor has attended IPM Guidance Manual Training to learn new information for the Town's IPM program even though Town staff does not do any pest management. The Town contracts with a company to do IPM structural pest control for all Town-owned buildings/facilities. For more information on IPM methods the Town implements see Section C.9 of this report.

See the C.9 Pesticides Toxicity Control section of the CCCWP FY 20-21 Annual Report for a summary of our participation in and contributions towards countywide and regional public outreach to pest control operators and landscapers to reduce pesticide use.

C.9.f ► Track and Participate in Relevant Regulatory Processes

Summarize participation efforts, information submitted, and how regulatory actions were affected; **AND/OR** reference a regional report that summarizes regional participation efforts, information submitted, and how regulatory actions were affected.

Summary:

During FY 20-21, we participated in regulatory processes related to pesticides through contributions to the countywide Program and CASQA. For additional information, see the Regional Report prepared by CASQA.

Section 10 - Provision C.10 Trash Load Reduction

General Guidance: Ensure the totals are correct in all tables.

C.10.a.i ► Trash Load Reduction Summary	
For population-based Permittees, provide the overall trash reduction percentage achieved to-date within the jurisdictional area of your municipality that generates problematic trash levels (i.e., Very High, High, or Moderate trash generation). Base the reduction percentage on the information presented in C.10.b i-iv and C.10.e.i-ii. Provide a discussion of the calculation used to produce the reduction percentage	
Trash Load Reductions	
Percent Trash Reduction in All Trash Management Areas (TMAs) due to Trash Full Capture Systems (as reported C.10.b.i)	26.5
Percent Trash Reduction in all TMAs due to Control Measures Other than Trash Full Capture Systems (as reported in C.10.b.ii) ⁵⁵	20.2
Percent Trash Reduction due to Jurisdictional-wide Source Control Actions (as reported in C.10.b.iv)	0
SubTotal for Above Actions	46.5
Trash Offsets (Optional)	
Offset Associated with Additional Creek and Shoreline Cleanups (as reported in C.10.e.i)	0
Offset Associated with Direct Trash Discharges (as reported in C.10.e.ii)	0
Total (Jurisdiction-wide) % Trash Load Reduction through FY 2020-21	100%
Discussion of Trash Load Reduction Calculation:	

Guidance:

- This section is not applicable to Non-population based Permittees. Non-population based Permittees should mark "NA" in all cells.
- Based on information presented in the C.10 tables following this page, report the % of trash reduced to-date from your jurisdictional areas that generate VH, H or M levels of trash, including any reduction offsets for additional creek and shoreline cleanups and direct trash discharges.
- The "Total (Jurisdiction-wide) % Trash Load Reduction through FY 2020-21" should equal the sum of the rows above that cell (with the exception of the subtotal row).
- Attach or provide website link to most recent version of your **Baseline Trash Generation map**.
- Delete highlighted text before finalizing.

⁵⁵ See Appendix 10-1 for changes between 2009 and FY 20-21 in trash generation by TMA as a result of Full Capture Systems and Other Measures.

C.10.a.iii ► Mandatory Trash Full Capture Systems

Provide the following:

- 1) Total number and types of full capture systems (publicly and privately-owned) installed during FY 20-21, and prior to FY 20-21, including inlet-based and large flow-through or end-of-pipe systems, and qualifying low impact development (LID) required by permit provision C.3.
- 2) Total land area (acres) treated by full capture systems for population-based Permittees and total number of systems for non-population based Permittees compared to the total required by the permit.

Type of System	# of Systems	Areas Treated (Acres)
Installed in FY 20-21		
Installed Prior to FY 20-21		
REM Revel – Connector Pipe Screens	77	53
LID	7	0
Catch Basin Filters – Village Theatre CIP	13	2,04
LID – Village Theatre (several LID facilities installed)	1	1.67
Total for all Systems Installed To-date	98	56.71
Treatment Acreage Required by Permit (Population-based Permittees)		40
Total # of Systems Required by Permit (Non-population-based Permittees)		N/A

C.10.b.i ► Trash Reduction - Full Capture Systems

Provide the following:

- 1) Jurisdiction-wide trash reduction in FY 20-21 attributable to trash full capture systems implemented in each TMA;
- 2) The total number of full capture systems installed to-date in your jurisdiction;
- 3) The percentage of systems in FY 20-21 that exhibited significant plugged/blinded screens or were >50% full when inspected or maintained;
- 4) A narrative summary of any maintenance issues and the corrective actions taken to avoid future full capture system performance issues; and
- 5) A certification that each full capture system is operated and maintained to meet the full capture system requirements in the permit.

TMA	Jurisdiction-wide Reduction (%)	Total # of Full Capture Systems	% of Systems Exhibiting Plugged/Blinded Screens or >50% full in FY 20-21	Summary of Maintenance Issues and Corrective Actions
1	7.4	94	20	<p>The FTC devices are contracted to be cleaned three times a year. The dates/timing is coordinated with Town Maintenance staff to ensure that the devices are routinely cleaned before they are full. The schedule is adjusted at times of heavy leaf drop and are coordinated with special events. Typically, this means that most cleanings occur Fall thru Spring.</p> <p>Some areas have not had access due to temporary outdoor seating platforms installed as response to provide the public access businesses.</p> <p>During a typical routine maintenance cleaning occasionally, devices cannot be reached due to parked cars next to the inlet. When this issue comes up, the contractor notifies Town staff then staff will do an inspection of the drainage inlet at another time to determine if a repeat maintenance visit is needed. Staff also evaluates whether these inlets are routinely missed due to parked cars, to modify the maintenance schedule.</p>
2	19.1			
3	NA			
4	NA			
5	0.0			
6	0.0			
7	0.			
8	NA			
Total	26.5			

Certification Statement:

The Town of Danville certifies that a full capture system maintenance and operation program is currently being implemented to maintain all applicable systems in manner that meets the full capture system requirements included in the Permit. The Town annually contracts three inspection and cleaning services per device each year for all FTC devices

C.10.b.ii ► Trash Reduction – Other Trash Management Actions (PART A)

Provide a summary of trash control actions other than full capture systems or jurisdictional source controls that were implemented within each TMA, including the types of actions, levels, and areal extent of implementation, and whether actions are new, including initiation date.

TMA	Summary of Trash Control Actions Other than Full Capture Systems
1 SRVHS	Historically, Town staff has worked with the San Ramon high school to reduce trash through their Environmental Studies Program. The Town installed several FTC devices surrounding the San Ramon Valley High School property due to trash concerns. Since 2015, Town Maintenance staff has been routinely cleaning up trash along Danville Blvd and on the west bank of San Ramon Creek across from High School. This area is a critical location due to its proximity to the creek and the fact that students park along the creek bank. This high school is non-jurisdictional, and it contains the only high trash generation area in Danville. Fortunately, there's a lot of underbrush and growth along the creek bank that capture the trash making it difficult for the debris to enter the creek. This section of creek is controlled by the Flood Control District and the Town has no jurisdiction. High school students have adopted this area to help keep it clean; so together with the Town the area seems to have less litter.
2 Old Town	Business Inspection program and Code Enforcement Efforts. Storm Drain Inlet Cleaning of all REM devices is conducted 3/yr in this TMA. The Town implemented a new trash/recycling container program since adoption of MRP 2.0, with increased trash/recycling containers throughout downtown, including near the high school.
3 misc	0 – merged into TMA 8
4 various open space	0 – TMA 4 was merged into TMA 8
5 misc. office, churches	Most of TMA was merged with TMA 8, 1 storage site remaining.
6 E. side com'l	Reduced in size from original. Business inspection program & code enforcement
7 Tass USPS	Code enforcement
8 Townwide	Public outreach, street sweeping, community events, plastic bag ban, new trash/recycling container management program.

C.10.b.ii ► Trash Reduction – Other Trash Management Actions (PART B)

Provide the following:

- 1) A summary of the on-land visual assessments in each TMA (or control measure area), including the street miles or acres available for assessment (i.e., those associated with VH, H, or M trash generation areas not treated by full capture systems), the street miles or acres assessed, the % of available street miles or acres assessed, and the average number of assessments conducted per site within the TMA; and
- 2) Percent jurisdictional-wide trash reduction in FY 20-21 attributable to trash management actions other than full capture systems implemented in each TMA; OR
- 3) Indicate that no on-land visual assessments were performed.

If no on-land visual assessments were performed, check here and state why:

Explanation:

TMA ID <i>or (as applicable) Control Measure Area</i>	Total Street Miles ⁵⁶ or Acres Available for Assessment	Summary of On-land Visual Assessments			Jurisdictional-wide Reduction (%)
		Street Miles or Acres Assessed	% of Available Street Miles or Acres Assessed	Avg. # of Assessments Conducted at Each Site	
1	0.01	0.00	0.00	0	0.0
2	0.20	0.14	0	0	0
3	0.00	NA	NA	NA	0.0
4*	0.00	NA	NA	NA	0.0
5	0.04	0	0	9	0

⁵⁶ Linear feet are defined as the street length and do not include street median curbs.

6	0.40	0.19	47.90	1	20.2
7	0.06**	0.0	0	0	0.0
8*	0.00	NA	NA	NA	0.0
Total					

GUIDANCE - C.10.b.ii – Trash Reduction – Other Trash Management Actions (Part B)

Total Street Miles or Acres Available for Assessment (Column 2) - For each TMA or applicable control measure area, list the total street miles or acres associated with jurisdictional areas with very high, high, or moderate baseline trash generation. Do not include street miles or acres associated with areas treated by full capture systems or low baseline trash generation.

Street Miles or Acres Assessed (Column 3) - For each TMA or applicable control measure area, sum the miles or acres for sites assessed. Do not include street miles or acres assessed that are associated with areas treated by full capture systems or low baseline trash generation.

% of Available Street Miles or Acres Assessed (Column 4) – For those Permittees using randomly selected sites, for each TMA or applicable control measure area, calculate the % of street miles or acres assessed by dividing the “Street Miles or Acres Assessed” (column 3) by the “Total Street Miles or Acres Available for Assessment” (column 2) and multiplying by 100. For those Permittees conducting assessments at strategic locations, place a “NA – Strategic Locations” in this cell.

Ave. # of Assessments Conducted at Each Site (Column 5) - For each TMA or applicable control measure area, calculate the average number of assessments conducted at each site by dividing the total # of assessments conducted at all sites in the TMA or control measure area, by the number of sites assessed in the TMA or control measure area. Round to the nearest whole number.

Jurisdictional-wide Reduction (%) – Use the following MRP formula and methods described in the MRP, calculate the trash reduction percentage associated with trash management actions other than full capture systems:

$$\% \text{ Reduction} = 100 \left[\frac{(12A_{VH(2009)} + 4A_{H(2009)} + A_{M(2009)}) - (12A_{VH} + 4A_H + A_M)}{(12A_{VH(2009)} + 4A_{H(2009)} + A_{M(2009)})} \right]$$

where:

- $A_{VH(2009)}$ = total amount of the 2009 very high trash generation category jurisdictional area
- $A_{H(2009)}$ = total amount of the 2009 high trash generation category jurisdictional area
- $A_{M(2009)}$ = total amount of the 2009 moderate trash generation category jurisdictional area
- A_{VH} = total amount of very high trash generation category jurisdictional area in the reporting year

A_H = total amount of high trash generation category jurisdictional area in the reporting year
 A_M = total amount of moderate trash generation category jurisdictional area in the reporting year
 12 = Very High to Moderate weighing ratio
 4 = High to Moderate weighing ratio
 100 = fraction to percentage conversion factor

Delete highlighted text before finalizing.

C.10.b.iv ► Trash Reduction – Source Controls

Provide a description of each jurisdiction-wide trash source control action implemented to-date. For each control action, identify the trash reduction evaluation method(s) used to demonstrate on-going reductions, summarize the results of the evaluation(s), and estimate the associated reduction of trash within your jurisdictional area. Note: There is a maximum of 10% total credit for source controls.

Source Control Action	Summary Description & Dominant Trash Sources and Types Targeted	Evaluation/Enforcement Method(s)	Summary of Evaluation/Enforcement Results To-date	% Reduction
Bag Ban	Bag Ban Ordinance became effective July 1, 2016. See Attachment C.10.b.iv. – Bag Ban Ord. This addresses general littering of plastic bags through wind, etc.	In June 2017, Town staff conducted a random survey of 26.5% of eligible businesses in Danville. (Based on a foot survey of businesses in 2016, Town staff estimated that 80% of all businesses were already in compliance with the bag ban before it took effect.) Only 10% of all debris collected in the FTC REM devices is plastic bags, wraps, cigarette butts, packing materials, plastic cups, straws and/or aluminum cans.	In 2020/21 no bag ban enforcement actions were conducted. However, Statewide SIP helped to reduce trash townwide. In 2019/20 no bag ban enforcement actions were conducted. In 2018/19 no bag ban enforcement actions were conducted. In 2017, 97.5% of surveyed businesses were compliant with the bag ban, the one business that was noncompliant was using up existing stock. They were educated on the ban.	7.5%
Trash Can Placements	The Town continues to actively responses and looks for locations to install trash and recycling cans throughout town in high litter areas.	Placement and pick up of trash/debris.	The town continues to monitor areas that may need trash and recycling efforts and when needed recycling and trash will be installed	na
Maintenance staff received hand-held tablets	The tablets are utilized to track field activities. The goal is to increase reporting efficiency.	Maintenance staff continue to use had-held devices to track field activities	Results are mixed and will be continued to see effectiveness of this program.	0

•

C.10.c ► Trash Hot Spot Cleanups

Provide the FY 20-21 cleanup date and volume of trash removed during each MRP-required Trash Hot Spot cleanup during each fiscal year listed. Indicate whether the site was a new site in FY 20-21.

Trash Hot Spot	New Site in FY 20-21 (Y/N)	FY 20-21 Cleanup Date(s)	Volume of Trash Removed (cubic yards)				
			FY 2016-17	FY 2017-18	FY 2018-19	FY 2019-20	FY 2020-21
Front St. Park – Tributary of San Ramon Creek	n	6/29/2021	.05	.38	.02	.03	.04

C.10.d ► Long-Term Trash Load Reduction Plan

Provide descriptions of significant revisions made to your Long-term Trash Load Reduction Plan submitted to the Water Board in February 2014. Describe significant changes made to primary or secondary trash management areas (TMA), baseline trash generation maps, control measures, or time schedules identified in your plan. Indicate whether your baseline trash generation map was revised and, if so, what information was collected to support the revision. If your baseline trash generation map was revised, attach it to your Annual Report.

Description of Significant Revision	Associated TMA
Baseline Trash Generation map change – Addition of 7 new basket filters and one CPS connector pipe screen and adding 5.97 acres to TMA 2	2
Baseline Trash Generation map change - TMA 3 was merged into TMA 8	3 & 8 - misc
Baseline Trash Generation map change - TMA 4 was merged into TMA 8	4 & 8 - various open space
Baseline Trash Generation map change - Most of TMA 5 was merged with TMA 8, 1 storage site remaining in TMA5	5 & 8 - misc. office, churches
Baseline Trash Generation map change - Reduced TMA 6 in size from original Trash Management Plan. All assessments were green.	6 - E. side com'l
Public schools (K-12) have been reclassified as a non-jurisdictional land use. So TMA 1 became entirely non-jurisdictional.	1 & 8

C.10.e. ► Trash Reduction Offsets (Optional)

Provide a summary description of each offset program implemented, the volume of trash removed, and the offset claimed in FY 20-21. Also, for additional creek and shoreline cleanups, describe the number and frequency of cleanups conducted, and the locations and cleanup dates. For direct discharge control programs approved by the Water Board Executive Officer, also describe the results of the assessments conducted in receiving waters to demonstrate the effectiveness of the control program. Include an Appendix that provides the calculations and data used to determine the trash reduction offset.

Offset Program	Summary Description of Actions and Assessment Results	Volume of Trash (CY) Removed/Controlled in FY 20-21	Offset (% Jurisdiction-wide Reduction)
Additional Creek and Shoreline Cleanups (Max 10% Offset)	NA	NA	NA
Direct Trash Discharge Controls (Max 15% Offset)	NA	NA	NA

$$1 \% \text{ Reduction Offset (Volume)} = (12A_{VH(2009)} + 4A_{H(2009)} + A_{M(2009)}) \text{ OF}$$

where:

- $A_{VH(2009)}$ = total amount of the 2009 very high trash generation category jurisdictional area
- $A_{H(2009)}$ = total amount of the 2009 high trash generation category jurisdictional area
- $A_{M(2009)}$ = total amount of the 2009 moderate trash generation category jurisdictional area
- 12 = Very High to Moderate weighing ratio
- 4 = High to Moderate weighing ratio
- OF = offset factor equal to (7.5×0.1) for the 2019 mandatory trash load reduction deadline, where 7.5 is the conversion from acres to gallons based on trash generation rates and 0.1 is the ten to one offset ratio

Appendix 10-1. Baseline trash generation and areas addressed by full capture systems and other control measures in Fiscal Year 20-21.

TMA	2009 Baseline Trash Generation (Acres)					Trash Generation (Acres) in FY 20-21 After Accounting for Full Capture Systems					Jurisdiction-wide Reduction via Full Capture Systems (%)	Trash Generation (Acres) in FY 20-21 After Accounting for Full Capture Systems and Other Control Measures					Jurisdiction-wide Reduction via Other Control Measures (%)	Jurisdiction-wide Reduction via Full Capture AND Other Control Measures (%)

Note: "NA" indicates that the TMA has no moderate, high, or very high trash generating areas (i.e., all low trash generation and/or non-jurisdictional) and therefore no additional trash control measures are needed.

- Assign an Appendix Number (e.g., Appendix 10-1) for the table above.
- **2009 Baseline Trash Generation (Acres)** – Provide the jurisdictional area (acres) in each trash generation category depicted on your most recent baseline trash generation map. Do not include non-jurisdictional areas.
- **Trash Generation (Acres) in FY 20-21 After Accounting for Full Capture Systems** – Provide the jurisdictional area in each trash generation category after moving all areas treated by full capture systems and reported in section C.10.b.i to "low/L" trash generation. (Total acres should match totals under the 2009 Baseline Trash Generation Section)

- **Jurisdiction-wide Reduction via Full Capture Systems (%)**
 - Using the load reduction calculation formula included in the MRP, provide the % reduction in your jurisdiction that has occurred in each TMA as a result of full capture systems.
 - For TMAs with no full capture system treatment, use "0.0%".
 - For TMAs with no moderate, high or very high trash generating areas (i.e., all low trash generation and/or non-jurisdictional) AND with no full capture system treatment, use "NA."
 - The "Total" in the last row should equal the sum of the rows above.
 - The % reductions reported for each TMA and the Total should be consistent with those reported in section C.10.b.i.
 - If a full capture system treats non-jurisdictional areas (e.g., public schools) and you chose to claim a trash reduction, indicate such in a footnote that states the percentage reduction claimed, the acreage of non-jurisdictional area treated and the associated baseline trash generation category.
- **Trash Generation (Acres) in FY 20-21 After Accounting for Full Capture Systems and Other Control Measures** - Provide the jurisdictional area in each trash generation category after moving all areas treated by full capture systems and reported in section C.10.b.i to "low/L" trash generation AND accounting for trash load reductions via on-land assessments reported in C.10.b.ii. (Total acres should match totals under the 2009 Baseline Trash Generation Section)
- **Jurisdiction-wide Reduction via Other Control Measures (%)**
 - For TMAs with no reductions calculated, use "0.0%".
 - For TMAs with no moderate, high or very high trash generating areas (i.e., all low trash generation and/or non-jurisdictional), use "NA."
 - For each column, the "Total" in the last row should equal the sums of the rows above.
 - The % reductions reported for each TMA and the Total should be consistent with those reported in section C.10.b.ii.
 - If a load reduction associated with other actions implemented in non-jurisdictional areas is claimed in section C.10.b.ii, indicate such in a footnote that states the percentage reduction claimed, the acreage of non-jurisdictional area addressed via other actions, and the associated baseline trash generation category.
- **Jurisdiction-wide Reduction via Full Capture AND Other Control Measures (%)**
 - Provide the sum of "Jurisdiction-wide Reduction via Full Capture Systems (%)" and "Jurisdiction-wide Reduction via Other Control Measures (%)" for each TMA.
 - For each column, the "Total" in the last row should equal the sums of the rows above.
 - If a full capture system treats non-jurisdictional areas (e.g., public schools) OR a load reduction associated with other actions in non-jurisdictional areas is claimed in section C.10.b.ii, indicate such in a footnote with the acreage of non-jurisdictional area treated and addressed via other actions and the associated baseline trash generation category.

Section 11 - Provision C.11 Mercury Controls

- C.11.a ► Implement Control Measures to Achieve Mercury Load Reductions**
- C.11.b ► Assess Mercury Load Reductions from Stormwater**
- C.11.c ► Plan and Implement Green Infrastructure to Reduce Mercury Loads**

See the CCCWP FY 2020-21 Annual Report for updated information on:

- Documentation of mercury control measures implemented in our agency's jurisdictional area for which load reductions will be reported and the associated management areas;
- A description of how the BASMAA Interim Accounting Methodology⁵⁷ was used to calculate the mercury load reduced by each control measure implemented in our agency's jurisdictional area (including green infrastructure) and the calculation results (i.e., the estimated mercury load reduced by each control measure);
- Supporting data and information necessary to substantiate the load reduction estimates; and
- For Executive Officer approval, any refinements, if necessary, to the measurement and estimation methodologies to assess mercury load reductions in the subsequent permit."

C.11.e ► Implement a Risk Reduction Program

A summary of CCCWP and regional accomplishments for this sub-provision, including a brief description of actions taken, an estimate of the number of people reached, and why these people are deemed likely to consume Bay fish are included in the CCCWP FY 2020-21 Annual Report.

⁵⁷BASMAA 2017. Interim Accounting Methodology for TMDL Loads Reduced, Version 1.1. Prepared for BASMAA by Geosyntec Consultants and EOA, Inc., March 23, 2017.

Section 12 - Provision C.12 PCBs Controls

C.12.a ► Implement Control Measures to Achieve PCBs Load Reductions

C.12.b ► Assess PCBs Load Reductions from Stormwater

C.12.c ► Plan and Implement Green Infrastructure to Reduce PCBs Loads

See the CCCWP FY 2020-21 Annual Report for:

- Documentation of PCBs control measures implemented in our agency's jurisdictional area for which load reductions will be reported and the associated management areas;
- A description of how the BASMAA Interim Accounting Methodology⁵⁸ was used to calculate the PCBs load reduced by each control measure implemented in our agency's jurisdictional area (including green infrastructure) and the calculation results (i.e., the estimated PCBs load reduced by each control measure);
- Supporting data and information necessary to substantiate the load reduction estimates; and
- For Executive Officer approval, any refinements, if necessary, to the measurement and estimation methodologies to assess PCBs load reductions in the subsequent permit.

C.12.f. ► Manage PCB-Containing Materials During Building Demolition

See the CCCWP FY 2020-21 Annual Report for:

- Documentation of the number of applicable structures in each Permittee's jurisdiction for which a demolition permit was applied for during the reporting year; and
- A running list of the applicable structures in each Permittee's jurisdiction for which a demolition permit was applied for (since the date the PCBs control program was implemented) that had material(s) with PCBs at 50 ppm or greater, with the address, demolition date, and brief description of PCBs control method(s) used.

⁵⁸BASMAA 2017. Interim Accounting Methodology for TMDL Loads Reduced, Version 1.1. Prepared for BASMAA by Geosyntec Consultants and EOA, Inc., September 19, 2017.

C.12.h ► Implement a Risk Reduction Program

A summary of CCCWP and regional accomplishments for this sub-provision, including a brief description of actions taken, an estimate of the number of people reached, and why these people are deemed likely to consume Bay fish are included in the CCCWP FY 2020-21 Annual Report

Section 13 - Provision C.13 Copper Controls

C.13.a.iii.(3) ► Manage Waste Generated from Cleaning and Treating of Copper Architectural Features

Provide summaries of permitting and enforcement activities to manage waste generated from cleaning and treating of copper architectural features, including copper roofs, during construction and post-construction.

Summary:

Metal roofs and architectural copper are discouraged through the Design Review process. However, if/when the Town's Municipal code is updated, and a provision to prohibit all architectural copper, including roofs, gutters and downspouts may be considered for inclusion.

C.13.b.iii.(3) ► Manage Discharges from Pools, Spas, and Fountains that Contain Copper-Based Chemicals

Provide summaries of any enforcement activities related to copper-containing discharges from pools, spas, and fountains.

Summary:

Pools/spas are required to discharge to landscape or sanitary sewer through the building permit process.

C.13.c.iii ► Industrial Sources Copper Reduction Results

Based upon inspection activities conducted under Provision C.4, highlight copper reduction results achieved among the facilities identified as potential users or sources of copper, facilities inspected, and BMPs addressed.

Summary:

The Town's CCCSD commercial/industrial inspections include identification of potential sources and uses of copper. Copper sources and adequacy of BMPs are evaluated during all commercial/industrial inspections. Vehicle service facilities that conduct brake service are routinely inspected for management of copper brake pads and the fine solids that are generated when servicing brakes. Vehicle washing operations are routinely evaluated to ensure the wastewater does not enter the storm drain system to control a variety of pollutants including copper. The Enforcement Response Plan elements are used when inadequate controls are identified. Inspectors are also trained to identify reduction BMPs as listed in the BASMAA POC inspector training material

Section 15 -Provision C.15 Exempted and Conditionally Exempted Discharges

C.15.b.vi.(2) ► Irrigation Water, Landscape Irrigation, and Lawn or Garden Watering

Provide implementation summaries of the required BMPs to promote measures that minimize runoff and pollutant loading from excess irrigation. Generally the categories are:

- Promote conservation programs
- Promote outreach for less toxic pest control and landscape management
- Promote use of drought tolerant and native vegetation
- Promote outreach messages to encourage appropriate watering/irrigation practices
- Implement Illicit Discharge Enforcement Response Plan for ongoing, large volume landscape irrigation runoff.

Summary:

The installation of a Central Irrigation System for Town of Danville parks and roadsides continues to be an important tool in the Town's commitment to reducing over-watering. Phase 1 of the central irrigation system focused on the five major parks (Osage Station, Sycamore Valley, Diablo Vista, Oak Hill and Hap Magee Ranch) and was completed in Spring of 2013. Phase II was completed in the Spring of 2015 and included smaller park sites as well as large turf areas along the roadsides. The Town continues to work with EBMUD to identify water requirements for Town-maintained areas. The Town utilizes EBMUD's Water Smart Program as well as the information that has been provided on the water billings to check water usage. The information provided by the water bills helps to show usage from year to year and what is the recommended water usage for that area based on plant type. This information is used to make proper irrigation adjustments for a better and efficient irrigation system. The Town uses daily Evapo-transpiration (ET) rate information to adjust the watering schedules at 33 irrigated sites. The Town uses the ET information to make seasonal and weather-related water adjustments. Additionally, the Town is testing new technology that uses underground soil moisture sensors to irrigate based on exactly how much water the site needs.

The Town also has an on-going program to identify areas where either drought tolerant or native plant material could potentially replace plant material that require more water. Every year, as the budget allows, the Town gradually continues to replace landscaping with drought tolerant species when approved by the Town Council. The Town has also eliminated turf in some areas and has bark mulched these areas to help reduce water usage and eliminate chemical use entirely. Grass has been removed from all Town-maintained medians to reduce water and chemical usage.

Through the CCCWP, Danville promotes and implements several programs and measures to minimize pollutant loading from excess irrigation. For example the Stormwater C.3 Guidebook which Danville adopted by ordinance, encourages land development professionals to design landscaping to: 1) minimize irrigation and runoff; 2) promote infiltration of runoff where appropriate; and, 3) minimize use of fertilizers and pesticides using pest-resistant plants that are suited to site conditions (e.g., soil and climate).

INSPECTION REPORT
September 15, 2020

Town of Danville Facility Maintenance Center.
1000 Sherburne Road, Danville, CA

Facility Contact: Jim Parke, Supervisor Maintenance Services

No changes were reported by Mr. Jim Parke.

Town of Danville Facility Maintenance Center has several buildings.

The front building is a two story edifice. It only has administrative offices.

Facility Maintenance Center (corporation yard), includes vehicle wash area, the area is connected to an oil-sand interceptor, landscape equipment area, vehicle parking areas, concrete bays area, and material storage areas.

Shop Building (Vehicle Maintenance Building)

There is a vehicle maintenance building, located in the middle of the property. Years ago, the building used to be a vehicle maintenance/repair shop, including floor washing activities.

The building is adjacent to the vehicle wash area.

There are three separate rooms in the building.

First room - The first room has a floor trench type and it is connected to the oil-sand interceptor. The room is mainly used for storage. There is no washing or maintenance activities in here.

Second room - Tools and small equipment are stored in the second room. There are no floor drains in here.

Third room - The third room is used to store supplies, such as small cans of paint, signs, and other landscape maintenance supplies; some gym equipment is stored in here.

The shop building rooms are clean, dry, and no sign of washing or auto-mechanical activities.

Mr. Parke emphasized that no washing, maintenance or repair operations of any kind is done in this area. The building is used for storage only.

ACE Auto shop located in the city of San Ramon makes all necessary repairs and vehicle maintenance. No maintenance of any kind is done at the corporation yard. No hazardous waste is generated in here.

Wash Pad Area

A wash pad area is located on the south side of the shop building.

The wash pad area connects to the oil-sand interceptor.

The inspection of the oil-sand interceptor showed little accumulation of solids and no thick oily layer was observed. There is variance on file to clean the interceptor every 6 months.

Facility has an oil-sand interceptor maintenance variance (every 6 months).

The wash pad area has no roof. It has a drain. To protect the sanitary sewer from rainwater infiltration a rubber drain mat is used to cover and seal the drain during rainfall events.

There is a written procedure of how to use the rubber mat. The procedure is posted on the wall of the shop building, adjacent of the wash pad area.

Mr. Parke said, "Only the exterior of the police cars and some city vehicles are washed in this wash pad area."

No car engine cleaning, or mechanical parts cleaning is done.

Gas and Diesel Pumps Area.

This area is close to the shop building.

There are two underground storage tanks in this area.

The first is a 10,000 gal gasoline tank and the second one is a 8,000 gal diesel tank.

There are two pump stations, one for diesel and one for gasoline. The area has a concrete floor. The area has no roof.

A spill kit is available in this area. Mr. Parke said that in case of spill a dry granules absorbent is available and the dirty absorbent will be disposed as hazardous waste. No accidents or spills to report, said Mr. Parke.

Yard Area

There are about six concrete bays; there is no roof.

The bays are used to store bark, mulch, asphalt, and soil.

Routine inspections are done prior to the rainy season to ensure that non-storm water discharges enter the storm drain system.

The bays are covered with tarp during raining events.

There is a concrete diversion channel on east side of the yard (bottom of the hill.)

It reduces the amount of sediment and runoff entering the yard. The channel is managed by Contra Costa County Flow Control.

During raining season, berms are installed to prevent sediment or runoff into the yard. All the storm drains are protected from sediments. Sand-rock bags are placed around the storm drains. Filter linen is placed inside the storm drains.

Facility has routinely large dumpsters mainly to collect green waste. When needed an extra dumpster is kept on site to manage extra green waste.
Maintenance crews collect small quantity of garbage during street cleaning.

Close to the entrance, there are several 20 feet containers; and they are used for storage supplies only.
The yard was clean and free of debris.

Hazardous Waste Storage.

Two hard roll-top pallet units are used to store hazardous waste. The units are made of rugged-polyethylene material and they will not rust or corrode.
The units keep rainwater out, protecting the drums from the elements and protecting the yard from spills or leaks.

Each unit stores one or two 55-gallon drums. The units provide inside spill containment.
The units are located in front of the vehicle maintenance building.
At the time of the inspection, small amount of paint was the only waste inside the units.

Maintenance workers occasionally collect small quantities of hazardous waste originating from car accidents and/or abandoned waste on the street.

Mr. Parke said that the hazardous waste generated at the site was eliminated since ACE Auto is doing all maintenance and repairs. No oil, brake fluids, antifreeze, or any petroleum wastes are generated in this location.

The rest of the buildings are used for storage and open parking spaces.

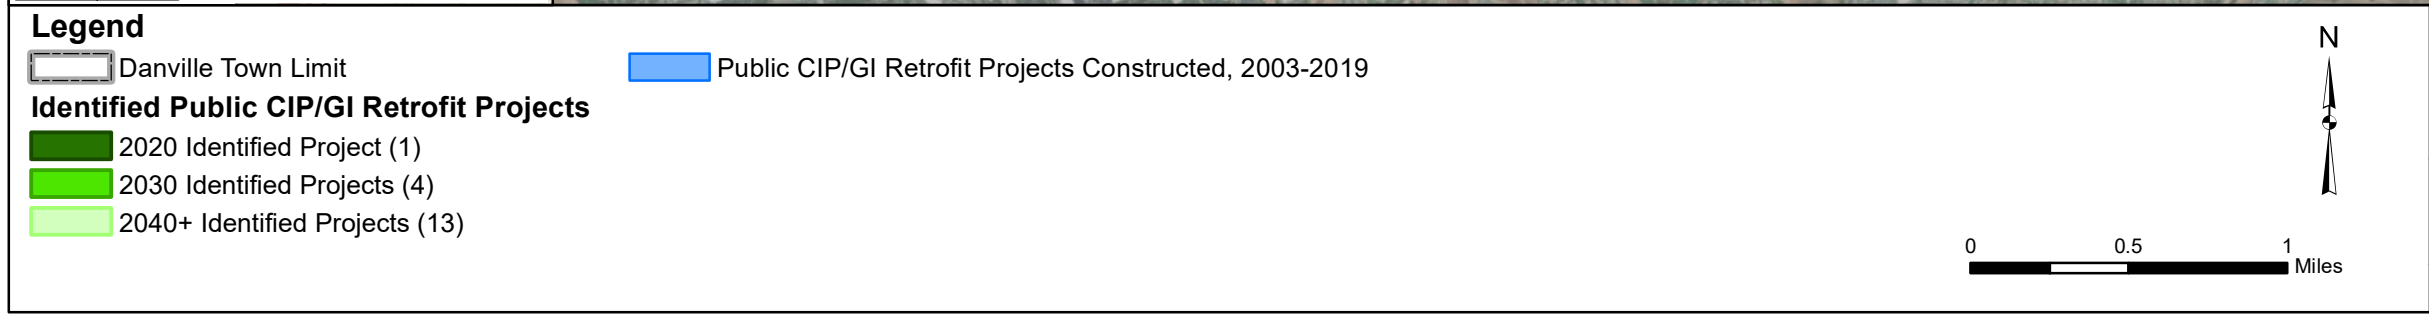

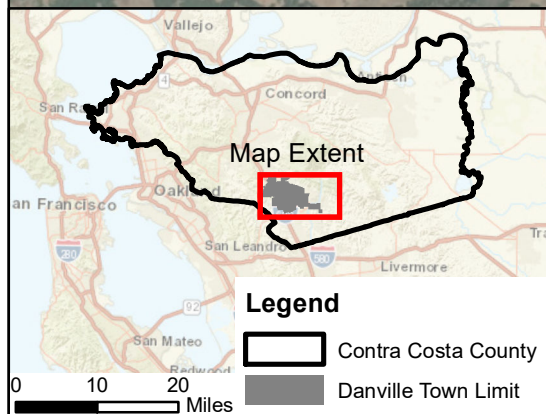

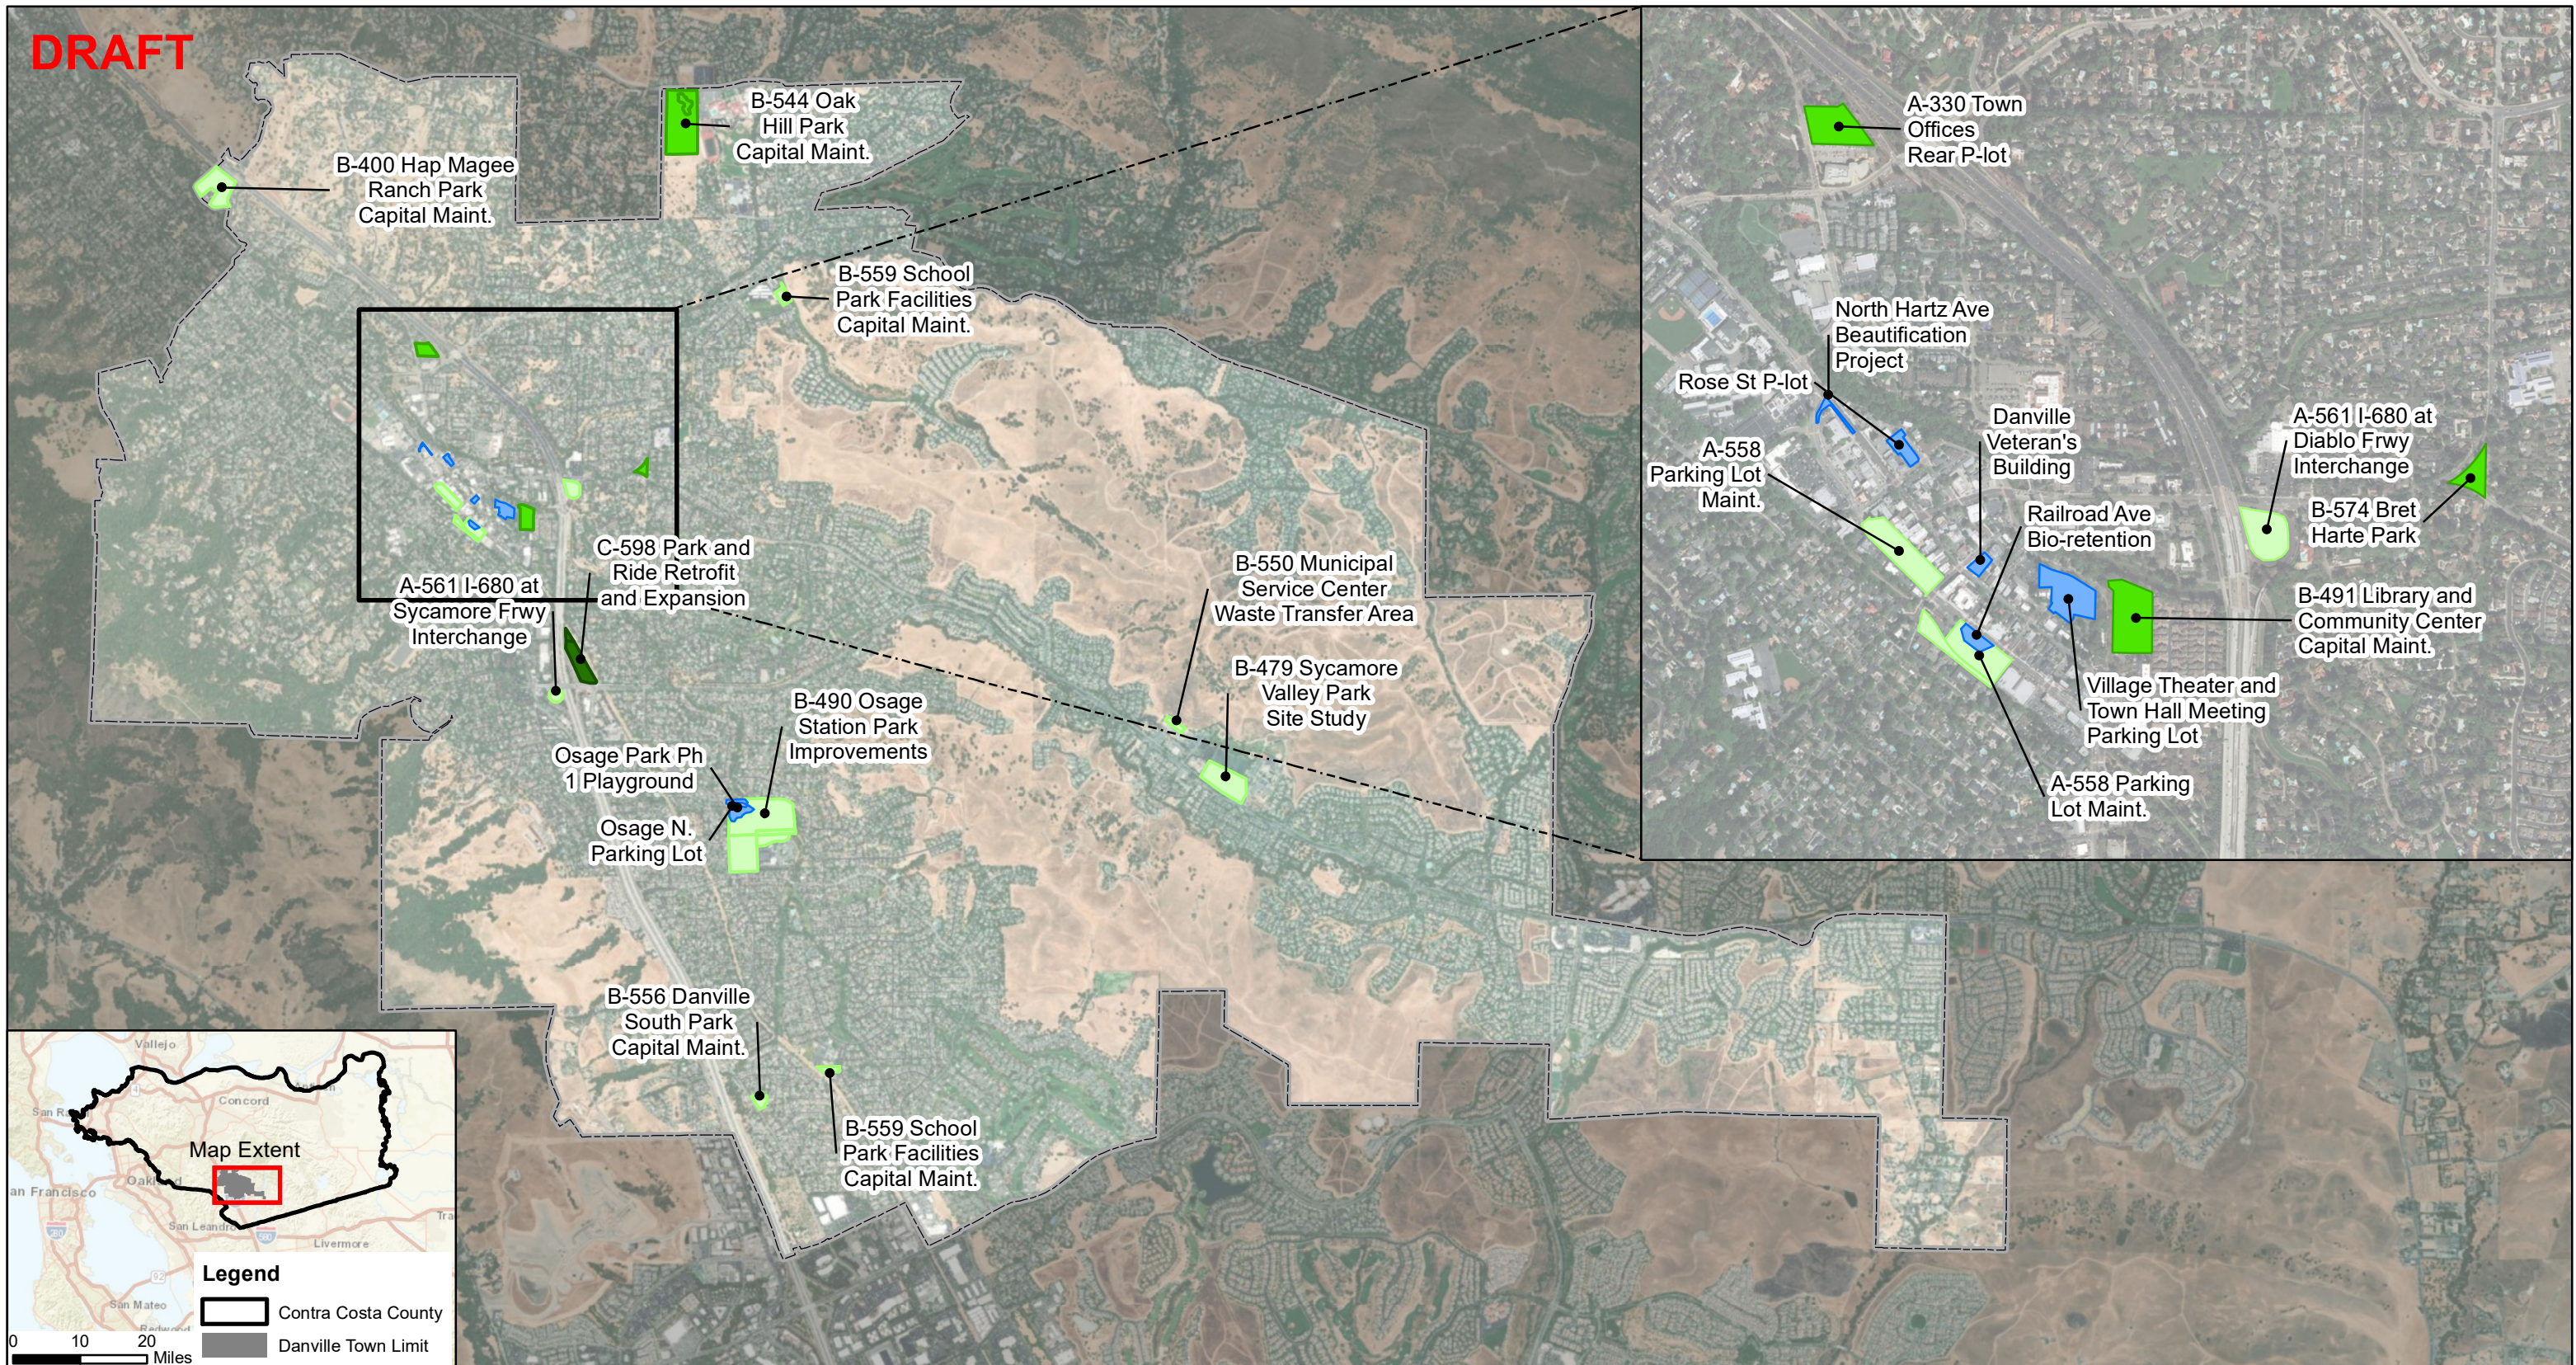

Storm drains are dry and free of debris.

No pesticides are used, and no pesticides are storage in the facility.

Facility is in compliance with storm water regulations and pretreatment regulations.

Asset Damage

Request	Topic	Status	Entered date	Description
20-2454	Illegal Dumping	Closed	08/12/2020	Center Way-trash is dumped on a daily basis
20-2565	Illegal Dumping	Closed	08/24/2020	Yesterday I submitted a service request to Caltrans re a pile of clothing dumped on el pintado sidewalk under 680, interestingly they responded this morning and referred me to Danville. I thought this would be a caltrans matter. Thanks, Tom
20-2623	Illegal Dumping	Closed	08/28/2020	Can someone please come out and pick up a mattress that was illegally dumped on the west side of Green Valley Rd between Valle Verde Ct and Donna Ln? it has been there for over a week. Thank You John Johnston
20-2658	Illegal Dumping	Closed	09/02/2020	Yesterday morning I noticed this chair.
20-2674	Illegal Dumping	Closed	09/04/2020	Bicycle left in the road
20-2678	Illegal Dumping	Closed	09/07/2020	Camino Tassajara--North? Mt Diablo side of street/in bike lane/between Alta Vista/Wood Ranch and Alta Vista (it hits Camino Tass twice, it appears someone's moving load had an item fall from vehicle and bounced. There are 3 spots close together: #1 2 black furniture legs, #2 a piece of sofa like furniture, (approximately 3 ft x 3 ft) and #3 a matching pillow. It could require bikers to go into the car lanes to avoid.
20-2765	Illegal Dumping	Closed	09/21/2020	Dumped or spilled?
20-2801	Illegal Dumping	Closed	09/23/2020	Broken glass on sidewalk
20-2820	Illegal Dumping	Closed	09/26/2020	Yesterday I noticed this hi-chair, it's on la gonda, thx
20-2905	Illegal Dumping	Closed	10/06/2020	Furniture left on the curb of San Ramon Valley Blvd, cross street Midland Way. Thank you.
20-2977	Illegal Dumping	Closed	10/15/2020	Yesterday EBMUD truck broke these limbs from oak tree across the street (el pintado). Unfortunately when EBMUD workers completed their job in the roadway, they left the broken limbs.
20-3020	Illegal Dumping	Closed	10/21/2020	Opp 1567 St. Helena - two small dressers
20-3062	Illegal Dumping	Closed	10/26/2020	Photo submitted
20-3091	Illegal Dumping	Closed	10/28/2020	Another dump, can a no dumping sign be installed here?
20-3150	Illegal Dumping	Closed	11/03/2020	More dumping
20-3205	Illegal Dumping	Closed	11/07/2020	Abandoned tent and trash.
20-3215	Illegal Dumping	Closed	11/09/2020	There is a dumped couch sitting on the sidewalk at the corner of Midland Way and San Ramon Valley Blvd for about 3 weeks. Please have this removed. Thank you.
20-3284	Illegal Dumping	Closed	11/18/2020	Traffic sign left a few ago and never picked up. Please remove from street. Thank you! IFO 401 Alcazar (off El Cap).
20-3345	Illegal Dumping	Closed	12/01/2020	People taking poops again here. On cut through path from Laurel to Iron Horse Trail. Reported same incident last month.
20-3392	Illegal Dumping	Closed	12/07/2020	Large Road Work Ahead sign left in front of our house by some company doing work down the street.
20-3504	Illegal Dumping	Closed	12/23/2020	Costco food item on sidewalk/curb at la gonda
21-0142	Illegal Dumping	Closed	01/18/2021	Large piece of insulation in road obstructing traffic
21-0171	Illegal Dumping	Closed	01/21/2021	Some sort of cables left at the in intersection of Sycamore and Camino Ramon

Request	Topic	Status	Entered date	Description
21-0234	Illegal Dumping	Closed	01/30/2021	there is a refrigerator on the corner of fountain springs circle and strawberry court north side
21-0258	Illegal Dumping	Closed	02/02/2021	Large plant dumped in street in front of 1145 Greenbrook Drive
21-0534	Illegal Dumping	Closed	03/05/2021	Mattress dumped at 275 Pariaso. Size not specified.
21-0716	Illegal Dumping	Closed	03/23/2021	excessive pile of leaves/tree limbs,etc on side of el Pintado road
21-0828	Illegal Dumping	Closed	04/03/2021	this box of used speakers was left here sometime today
21-0830	Illegal Dumping	Closed	04/03/2021	I run by the creek near St. Isadore's and Danville Blvd and see that a bike, an office chair and a couple of other things have been dumped in there. If it were just the bike and the chair then I thought I would just try to pull it out, but I'm not sure what the big metal thing is and if I can get that out! Thank you.
21-0881	Illegal Dumping	Closed	04/08/2021	Photo attached
21-0891	Illegal Dumping	Closed	04/09/2021	clothing/items left on side of the road need to be picked up for disposal
21-1061	Illegal Dumping	Closed	04/22/2021	Looks like someone has been dumping their garbage along the creek side near the volleyball court at Diablo Vista Park.
21-1069	Illegal Dumping	Closed	04/25/2021	Location: Corner of Alta Vista and Camino Tass. With Blackhawk behind you, sign is on right hand corner just through the intersection. The sign should be removed. Also for community safety from possible scams, perhaps the police should investigate the the phone number. Advertising Signage for Google and Facebook Ads
21-1215	Illegal Dumping	Closed	05/04/2021	White upholstered chair dumped on corner of Diablo Creet Place and Blackhawk Rd.
21-1416	Illegal Dumping	Closed	05/21/2021	A wheel and tire have been dumped on the corner of Diablo and Alamos. Please remove.
21-1509	Illegal Dumping	Closed	06/02/2021	Email to: maintenance@danville.ca.gov Subject: Illegal dumping - Across Street from 341 La Questa Dr ***CAUTION*** THIS EMAIL WAS NOT SENT FROM DANVILLE STAFF This email originated from outside of the Town of Danville and was not sent from a Town Staff member! Do not click on links or open attachments unless you recognize the sender and know the content is safe. Good Afternoon, My name is Rob Nowacek and I am the owner of 341 La Questa Dr here in Danville. La Questa drive has drainage easements on each side of the road that are Town of Danville property this area is not private property. We have paid for a property surveyor to mark our property lines and can provide back up to show where the Town of Danville property starts and private property ends. It is 20' from the center of La Questa Dr on each side of the road . Dumping of old trees, concrete fence posts and other debris are continually placed along the road side here. Pictures are below. I have no problem taking the items to the dump with your approval. Please make arrangements to clean up the Town of Danville Property. Town of Danville's Website says : FINAL WORD: Not only does illegal dumping destroy the environment and harm plants and animals, it also has a number of other negative effects on society. If garbage is dumped in an area accessible to the public - and especially children - such as a park, then people can be exposed to health and injury risks. The clean-up of illegally dumped garbage costs governments and tax-payers millions, if not billions of dollars per year. This money could be better used in the preservation and care of the environment, rather than in the clean-up of completely preventable and thoughtless dumping. If you care about the environment even a little, then you would never consider illegal dumping as a method of waste disposal. Rather, take the extra time and deliver your trash directly to a dump or tip, even if it costs a little more. Thank you Rob Nowacek 510 501 1416 [cid:image001.png@01D757AD.33B35B30] [cid:image002.png@01D757AD.33B35B30] [cid:image003.png@01D757AD.33B35B30]

Attachment – C.9 - Wet Weather Danville Today article.

Here Comes the Rain – Hopefully!

The rainy weather will do the earth some good, but so can you - here are some key facts you need to know:

1) Leaky cars lead to more pollution than oil spills. Most of the oil that seeps into North American oceans each year stems from human activity, such as the motor oil leaking from our cars and onto the road every day. Since rain helps carry that oil into waterways, check your car for leaks now and get them fixed.

2) The rainy season's the best time to go pesticide-free. Rain speeds up the flow of chemical residues from your lawn and garden into storm drains. To curb your use of water-polluting pesticides, try opting for organic pesticides, luring ladybugs and birds into your garden, and planting certain veggies side-by-side to naturally repel insects (placing lettuce next to radishes, for example, can help fend off earth flies). Look for the "Our Water Our World" options at our local Ace Hardware store and Sloat Gardens. Remember pesticides linger. If you hire pest control, protect your family and look for an eco-certified professional, see <https://www.cccleanwater.org/pesticideslinger/> for more information.

3) Dog poop's a top cause of water contamination. Even if splashing through puddles isn't your idea of a good time, chances are your dog won't mind a rainy stroll. Just be sure to grab dog-waste bags before you venture out. Research shows that U.S. dogs generate 10 million tons of poop each year, and that 40 percent of dog owners don't bother to scoop up their pet's droppings—a major

contributor to water pollution, especially when the rain's hitting hard.

Attachment – C.10.b.iv. – Bag Ban Ord

7-7 CARRYOUT BAGS.

7-7.1 Definitions.

For the purposes of this chapter only, the following words and phrases shall have the meanings defined in this section unless the context clearly requires otherwise:

Carryout Bag means any bag, including a Plastic Bag, provided at the check stand, cash register, point of sale or other point of departure for the purpose of transporting food, merchandise, or other goods out of a Retail Establishment or a Public Eating Establishment. Carryout Bags do not include Produce Bags or Product Bags.

Customer means any person purchasing goods from a Retail Establishment or a Public Eating Establishment.

Inspector means the Town's Code Enforcement Officer or any other Town officer or employee designated by the Town Manager pursuant to Section 1-5.8 of this Code to conduct any inspections required or permitted under this Chapter.

Operator means the person in control of, or having the responsibility for, the operation of a Retail Establishment or Public Eating Establishment, which may include, but is not limited to, the owner of a Retail Establishment or a Public Eating Establishment.

Person means any natural person, firm, corporation, partnership, or other organization or group however organized.

Plastic Bag means any bag made predominantly of plastic derived from either petroleum, ethylene derived from natural gas, or a biologically-based source, such as corn or other plant sources. The term "Plastic Bag" includes compostable and biodegradable bags but does not include Reusable Bags, Recycled Paper Carryout Bags, Produce Bags, or Product Bags.

Postconsumer Recycled Material means a material that would otherwise be destined for solid waste disposal, having completed its intended end use and product life cycle. Postconsumer Recycled Material does not include materials and by-products generated from, and commonly reused within, an original manufacturing and fabrication process.

Prepared Food means foods or beverages which are prepared on premises by cooking, chopping, slicing, mixing, freezing, or squeezing, and which require no further preparation to be consumed, other than heating. Prepared food does not include any raw, uncooked meat product or fruits or vegetables which are chopped, squeezed or mixed.

Produce Bag means any bag without handles used exclusively to carry produce, meats, or other food items to the point of sale inside a Retail Establishment or to prevent such food items from coming into direct contact with other purchased items.

Product Bag means a bag integrated into the packaging of the product or a bag used (1) to hold prescription medication dispensed from a pharmacy; or (2) to segregate food or merchandise that could damage or contaminate other food or merchandise when placed together in a Reusable Bag or Recycled Paper Carryout Bag (examples include small paper bag for greeting cards, paper bags to protect glass bottles, plastic bags around ice cream or other wet items, paper bags used to weigh candy, etc.).

Public Eating Establishment means a restaurant, take-out food establishment, or any other business that receives 90% or more of its revenue from the sale of Prepared Food to be eaten on or off its premises.

Recyclable means material that can be sorted, cleansed, and reconstituted using available recycling collection programs for the purposes of using the altered form in the manufacture of a new product. Recycling does not include burning, incinerating, converting, or otherwise thermally destroying solid waste.

Recycled Paper Carryout Bag means a paper bag that meets all of the following requirements: (1) contains no old growth fiber, (2) is one hundred percent (100%) recyclable overall and contains a minimum of forty percent (40%) Postconsumer Recycled Material; (3) displays the word "Recyclable" in a highly visible manner on the outside of the bag; and (4) and displays the percentage of Postconsumer Recycled Material used. Recycled Paper Carryout Bags do not include Produce Bags or Product Bags.

Retail Establishment means any commercial establishment that sells perishable or nonperishable goods including, but not limited to, clothing, food, and personal items directly to a Customer; and is located within or doing business within the geographical limits of the Town of Danville.

Reusable Bag means a bag with handles that is specifically designed and manufactured for multiple reuse and meets all the following requirements: (1) has a minimum lifetime of 125 uses, which for purposes of this subsection, means the capability of carrying a minimum of 22 pounds 125 times over a distance of at least 175 feet; (2) is machine washable or capable of being cleaned and disinfected; (3) does not contain lead, cadmium, or any other heavy metal in toxic amounts as defined by applicable State and Federal

standards and regulations for packaging or reusable bags; and (4) if made of plastic, a minimum of 2.25 mils thick.

(Ord. #2014-11, §2)

7-7.2 Prohibition of Plastic Carryout Bags.

No Retail Establishment or Public Eating Establishment shall provide any Plastic Carryout Bag to a Customer.

(Ord. #2014-11, §2)

7-7.3 Permitted Bags.

a. All Retail Establishments or Public Eating Establishments shall provide or make available to a Customer only Recycled Paper Carryout Bags or Reusable Bags for the purpose of carrying away goods or other materials from the point of sale, subject to the terms of this Chapter.

b. Nothing in this Chapter prohibits Customers from using bags of any type that they bring to the Retail Establishment or Public Eating Establishment themselves or from carrying away goods that are not placed in a bag.

(Ord. #2014-11, §2)

7-7.4 Use of Reusable Bags.

a. All Retail Establishments are strongly encouraged to make Reusable Bags available to Customers for purchase.

b. Each Retail Establishment is strongly encouraged to educate its staff to promote Reusable Bags and to post signs encouraging Customers to use Reusable Bags.

(Ord. #2014-11, §2)

7-7.5 Inspection.

An Inspector shall have the right to enter any Retail Establishment or Public Eating Establishment during regular business hours, without a search or inspection warrant, to make reasonable inspection to ascertain whether there is compliance with the provisions of this Chapter.

(Ord. #2014-11, §2)

7-7.6 Enforcement.

a. Upon finding that a violation of this Chapter has occurred, an Inspector shall issue a written warning notice to the Operator of the Retail Establishment or Public Eating Establishment that a violation has occurred and the potential penalties that will apply for future violations.

b. Any Retail Establishment or Public Eating Establishment that violates or fails to comply with any of the requirements of this Section after a written notice has been issued for a previous violation shall be guilty of an infraction.

(Ord. #2014-11, §2)

Subject: Drain Inlets

Dave,

Do you have this number? State the number of municipally maintained storm drain inlets in your jurisdiction

Bob Russell PLA, CPSI
